

**Hegel, Marx, Lenin, Karl Popper, Huntington, Fukuyama - ideologues and ideologues of the representatives of Prof. Momchil Dobrev-Halachev
“Financially banking resource-based technological mafia-driven materialism” for the robbery of peoples, nations, interests**

**Lord Prof. Momtchil Dobrev, Prof. Mariola Garibova, Alexander Gariboff & Mariika Dobreva
Scientific Research Institute Dobrev & Halachev JSC.**

Abstract

Lord Prof PhD Momtchil Dobrev-Halachev developed in 2010 “Financially banking resource-based technological mafia-driven materialism” as a based principle materialismus since more than 17 century. In 2008 “Theory of generating of crises” in 2010 “Theory and praxis of the Mafiotismus” and in 2001 “Theory of the mafia”. Based on these theories this paper explains the establishment of the mafiotismus all over the world – principles, theory and praxis in European Union, European Commission and in the Republic Bulgaria, the practice of work of the George Soros as an example of that.

Key words: *Mafiotismus, Crises, mafia, corruption, theory, finance.*

1. Introduction

In the year 2010, Lord Prof. Momtchil Dobrev developed the “Theory of Mafiotismus” as a new state niveaou based on private and personal interests of the prime-minister, ministers, government. Based on this “Theory of Mafiotismus” Lord Prof. Momtchil Dobrev developed in 2010 the “Financially banking resource-based technological mafia-driven materialism” as a based principle materialismus since more than 17 century.

In the year 2001, Lord Prof. Momtchil Dobrev developed the Theory of the mafia and Theory of corruption. All the both theories have been developed by analyzing of the mafia and the corruption all over the world; in Bulgaria, Germany, European Union, and other countires.

In the year 2008, Lord Prof. Momtchil Dobrev developed the “Theory of generating crises”. The theory of generating crises has been developed by analyzing all the relationships between countries, and lysing the causes and consequences of crises. The theory examines all possible options for generating crises.

In this paper, we described the activities of the financial magnet George Soros and how his activities proof the golas, purposes, methods of the “Financial Banking Resource technological mafia driven Materialismus”.

1.1 Introduce the Problem

The problem of the emerging new kind and the real “Financially banking resource-based technological mafia-driven materialism” as a based principle of the development of the society since the 17 century and as a opposite of the “Historical materialismus” of the Carl Marx of capitalism and after that based on the theory of Carl Poper and his follower the financial guru George Soros developed by Lord Prof. Dr. Momchil Dobrev as a part of the MAFIOTISMUS is enormous because it concerns not only the rule of one state but also the governance of a union of states and a way of managing the world. This is really world order materailismus with precisely defined principles and ways of management.

The covering of the real way how the world is working since the 17 century and which power is driven it it very important of the covering the real process of development of the human world. And the process in days today following the steps of George Soros.

The developed by Lord Prof. Dr. Momchil Dobrev Financially banking resource-based technological mafia-driven materialism cover the real process in all countries, in nationa, in states, all over the world. The conclusions of the principles of the Financially banking resource-based technological mafia-driven materialism developed by Lord Prof. Dr. Momchil Dobrev cover the real sources and power and people that are managing the politics, the nations, the states all over the world.

2. Research Methods

Research methods of occurrence of Financially banking resource-based technological mafia-driven materialism and the MAFIOTISMUS, its logic of work, of existence, of management and its execution by activities of George Soros.

3. Principles of the Financially banking resource-based technological mafia-driven materialismus, The actions of George Soros based on the Prof. Momtchil Dobrev’s “Financial Banking Resource-Technologically Mafia- driven Materialismus” and the Real Theory of Open Society of Carl Popper and Principles of creating the European Union of the Mafiotismus and of the financial bank respiration techno-materialised materialism

3.1. The principles of the Financially banking resource-based technological mafia-driven materialismus

The only purpose is the profit and enslavement of peoples, states, governments, creation of monopolies. Participating countries - banks, financial institutions, companies - oil, resources, steel, oil, food, medicines, fuels. Finance and money determine politics, wars, peace.

Primary goal and approach: Central bank formation in the major countries to control not only finance, but also economic activity and politics. These central banks will be governed by governments, states, parties, citizens, a whole territory, in terms of money, investment, resources, use, in whose behalf and for what.

These are the initial steps. Establishment of central banks in the major countries in fact to control not only finance but also economic activity. Establishment of central banks in countries owned by private individuals and private banks. This controls the economies of these countries, governments of these countries, citizens, over entire societies. Where central private banks are not allowed to be created in the countries - it is the occasion to generate civil wars, wars between states, trigger "revolutions" - to finance them from the bank-financial resources

technological capital. Creating conditions for destabilization of the country concerned, importing corruption, provoking a civil war, provoking war, creating conditions for the maturing of an economic crisis, leading to the destabilization of the political power in the country. Generating and provoking wars, conflicts, fickle confessions, financing both the warring parties with loans - with the ultimate goal of profit, debt, then giving credit for the recovery of these states, lending to rebuild the economies of the warring states, shunning companies managing resources - oil, gold, trade, medicines, food, creating a military situation - unlocking - an institutional occasion.

System: Funding both sides to wage war between them. Practical parties are indebted to banks, then banks and financial institutions finance the recovery of their economies. Profits are enormous. The profit rate for weapons and ammunition is the highest and most rapidly recoverable and revamped. They finance supplies of weapons, ammunition, food, clothing, ammunition, extra equipment, they actually manage the war process - when there is an advantage for one side, for the other. Realistically with supplies of weapons, ammunition, they manage the process of war - which side takes precedence and when and for how long.

The Goal: Government control - not only through finances, but also by building up faithful government and state subjects - from universities, world institutions, clubs, lodges, foundations, which then either become presidents, prime ministers, ministers, leaders and important institutions. Control of security services and control of compromise.

Control of whole countries through debt securities control of governments, states. Money control, their circulation, movement, direction, direction.

Policy control and policies, Press control, Policy control, Control of the Masonic lodges.

Purpose and purpose of war, military conflict, aggression - profit.

Control and avoid the introduction of technology. Control and prevent the production of technology and free energy to be enjoyed by all people and peoples.

Control of patents that contribute to the development of civilization, not to see the world, to be forgotten, not to be used.

Control and liquidation of scientists who have created innovative solutions for the benefit of humanity in science, technology, and treatment.

Control and avoidance of the production of treatments for the treatment of lethal diseases.

Import and export of corruption in one country to its destabilization.

Imports of terrorism.

Export and import of mafia principles in one country.

Debt economy, money control. A person who controls money controls states, societies, peoples, governments.

Manifestation of the masses, peoples, personalities.

Personality control, with debit, credit cards, mobile phones, mobile applications - uninterrupted control.

Civil Society Control through Foundations - NGOs to Replace Public Opinion, Funding to Control and Manage Society.

Command not all resources of the earth, oil, gold, silver, uranium and income from them.

Managing the population through illnesses.

Management of the population through pollution of the environment

Technology management, when technology is being introduced into a conversion, why not, keep another, disappear.

Private repositories of tremendous wealth.

Crisis Generation - Any, Economic, Currency, Social, Refugee, Conflict, War Political Crisis. The financial crisis occurs the fastest, the currency crisis occurs instantly, They are followed by economic crises, Part of the financial

crisis and one kind of it is the currency crisis. There is a financial crisis. There are always economic crises. World currency controlled by members.

Crisis generation schemes:

- Invocation of wars
- Invocation of military conflicts
- Call for military intervention in a country
- Import and export of corruption, mafia,
- Tracking money out of circulation, it immediately creates economic crises. In turn, they cause huge damage to whole countries. Accordingly, he gets loans.
- Crisis crisis - caused - creates economic, social, demographic, social, political crises.
- Inviting the Financial Crisis
- Inviting the Currency Crisis
- Inviting Economic Crises
- The call for an otic crisis - not always last
- Increase of deficit - for the purpose of signing
- World wars become redundant due to the danger of nuclear exchange, so terrorism will be used.
- Managing the population through fear. Planting fear among the population.
- Creating an antipode - through fear, manipulation,
- Creating an intrigue machine
- Creating a machine for seeming occasions - for wars, conflicts, aggressions, diversions,
- Induction of inflation and deflation afterwards
- Creating antipodes - with the ultimate goal of the Cold War battle - generates huge profits, enormous cash flows,
- Possession of resources
- The machine of intrigue and compromise and the creation of fake occasions.
- Generating, financing and combating terrorism.

3.2. The actions of George Soros based on the Prof. Momtchil Dobrev's "Financial Banking Resource-Technologically Mafia- driven Materialismus" and the Real Theory of Open Society of Carl Popper

The Principal Scheme of George Soros work is as follows:

The goals of George Soros are as follows:

Destabilization - chaos of one country, a whole system, inside - without war

Destabilization - chaos in economic direction

Destabilizers - a chaos of society

Destabilization - a chaos of civil society

Destabilization of the currency

The destabilization of the economy

Destabilization - anxiety in education

Breaking the moral norms of a society

Breaking the ethical norms of a society

Crisis management - with the ultimate goal of profit - speculative profit.

Destabilization - of a society at all levels using - ethnicity, religion

All this without War

Governing a country, whole countries, - in the case of the European Union, with the ultimate goal of profit -

Managing a state at all levels through its close and faithful people
Demoralizing one community
Replace civil society with its structures to replace the real Citizenship
Financing and support of media - television, newspapers, magazines, etc.
Financing political parties for the purpose of getting power and using them.
Financing of individuals who will be useful in the future for its purposes - social scientists, political scientists, politicians, scientists, historians, of all classes.

Generating crises by George Soros

Approach:

Establishment of non-governmental organizations in all countries
Establish any institutes like NGOs
Creating any unions - judges, prosecutors, investigators, scientists, sociologists, political scientists,
Creating Institutes -
Funding these NGOs
Funding these institutes
Financing of specific persons - politicians, political scientists, sociologists, scientists, analysts, government
It finances revolutions in racist countries
Funding refugee waves
It funded protest-taking regimes in Africa
Finalizing events with the aim of destroying countries with the seizure of their raw materials and resources.
Expansion of the borders of the government-controlled countries
Introducing the use of marijuana, orthokids for medical purposes

According to Professor Robinson, Weizop's program is as follows:

1. Destroy all peacekeepers.
2. Removal of legacy
3. Removal of private ownership
4. Removing patriotism
5. Destruction of the population
6. Removal of religion
7. Establishing a world government

In fact, with his actions and results from his work, Soros proves that he is working on this program.

3.2.1. Soros crisis generation schemes

Crisis generation schemes:

- Privacy of chaos in one country - political, economic.
- Import and export of corruption, mafia,
- Tracking money out of circulation, it immediately creates economic crises. In turn, they cause huge damage to whole countries. Accordingly, he gets loans.
- Crisis crisis - caused - creates economic, social, demographic, social, political crises.
- Inviting the Financial Crisis
- Inviting the Currency Crisis
- Inviting Economic Crises

- The call for an otic crisis - not always last
- Increase of deficit - for the purpose of signing
- World wars become redundant due to the danger of nuclear exchange, so we will use the creation of the HHS in whole countries.
- Creating an intrigue machine
- Creating a machine for seeming occasions - for wars, conflicts, aggressions, diversions,
- Induction of inflation and deflation afterwards
- Not the resources
- The machine of intrigue and compromise and the creation of fake occasions.
- Generating, financing and combating terrorism.
- Generating the WAVE and the profit from it.
- Generation of "Democratic Revolution" – Yellow Revolution and others in different sidelines - and use of chaos to penetrate certain companies to Still Country Materials- the example of Libya and other countries.

The Soros Scheme (Györ Schwartz) for Entry in Countries and the Establishment of Parallel Structures

The Open Society as a concept, as a system in the work of the Soros. About Soros the open society is what opposes isolationism and unitary thinking, that is, of "totalitarianism". Soros adopts the ideology of Carl Popper, who, in 1945, publishes its books on Open Society and its enemies. Soros created the foundation of the Open Society Foundation in the early 1980s in former socialist countries. This begins in his native Ugaria. It attracts dissident people, the opening of Hungary to the West accelerates the fall of the Burlinska wall.

3.3. Principles of creating the European Union of the Mafiotismus and of the financial bank respiration techno-materialised materialism

The European Union is project of the representatives of the “Financial-Bank Resource Technology Mafiotised Materialism”.

Objectives for the establishment of the European Union:

Controlling and managing all the countries of Europe through an organization

Establishment and control and management of an organization that is supranational, according to which decisions all countries should comply

Introducing a single currency for Europe

Consumption control and management across Europe

Market control and management in Europe

Controlling and managing consumer markets and maximizing profits in Europe

Controlling and managing nations, peoples, consumption in Europe

Controlling and managing income distribution in Europe

Investment Control and Management in Europe

Controlling and managing the movement of money in Europe

Controlling and managing the banking and financial system across Europe through one institution - the European Central Bank

Controlling and managing consumer markets and maximizing profits in Europe

Controlling and Managing Industries in Europe

Control and management of industrial production in Europe

Control and Management of All Industries in Europe

Control and management of health systems in Europe

Controlling and managing education in Europe
Controlling and managing pharmaceuticals and maximizing profits in Europe
Control and management of the demographic process
Control and management of immigration processes in Europe

Principles of operation creation and control and management of the European Union:

Establishing an alliance of states with the ultimate goal of being able to manage more easily from one place, from one governing body, to control, to make dependent financial, market, investment, production, military, resource, industrial, with the ultimate goal profits at any level

Extending and creating markets for their products, in particular to Germany France. After all, profits return to Germany, France, Italy, the Netherlands

Expanding and creating markets for their food producers from Germany France, Italy

Create double standards for food sold in Germany and another standard sold in Bulgaria

Expanding markets for sale to their producers of meat, cheese, pastries, all kinds of products

Create markets for selling their tools for home use as well as for German business specialists

Establishing conditions for bankruptcies of enterprises of the respective small country

Creating conditions for foreign investments - real money laundering, export of income, export of products, making profits outside the country where the investment is made. The cheap labor is actually used, in the country where it is put to expansion, no profit is made in this country, no taxes are paid, the profits go to the parent companies in Germany, France, USA and others. Establishing conditions for the entry of their chains for the sale of food and other goods in the countries that have been admitted to EU expansion, money laundering, sale of goods, services of the countries of the mother companies mainly from Germany, France and others, hiding profits, exporting profits on criminal roads

Establishing conditions for export of national income - without being taxed, and others

Establishing conditions for the management of the current process for the receipt of financing from the european funds

Establishing conditions for monitoring the current process of receipt of funding of variable funds

Establishing conditions for the development of different energy sources of the country

Establishing conditions for depopulation of the country concerned

Creation of conditions for Islamization

Creating chaos conditions in the respective country

Establishing terms of intermediate acquisition of financing from the European funds - between 30% and 40%.

Establishing terms and conditions those companies to participate in infrastructure projects and projects.

Establishing conditions that, when financing, the respective companies in the respective country should be obliged to buy equipment, equipments, machines, equipment, goals, installations, goals, production lines in Germany, France.

Establishing conditions of dependence of the banking system of the respective country from the respective banks of MAFIA. And of financial-bank resource - technological materialism. The Banking Institutions of Europe - Germany, Italy, France - USA - of the Rothschild Rockefellers Creating a Common Military Block - Creating the North Atlantic Treaty - NATO April 4, 1949 in Brussels and thus security control and dependence of all US states, the US military complex of the United States, the establishment of US bases in the countries of the Union of Germany.

3.3.1. Historical consistency and evidence of the whole process of the formation of the European Union

1. The capitulation of Germany May 7-8, 1945 in Berlin.
2. Kanzleracte
3. The Morgentaw Plan
4. The Marshall Plan
5. 5.1. The Coal and Steel Treaty.
- 5.2. NATO
- 5.3. the profit of representatives of Financial Banking Resource Technological Mafia-driven Materialismus - in Germany, France, Italy, Belgium, the Netherlands and other east European countries - 30% to 56% of the budget of the European union every year

4. Mafiotismus in the world, European Union and European Commission and European Institutions

Formula of the Mafiotismus for the European Union, European Commission and European institutions including the European Courts.

The most simple model of the mafiotismus that describes the factors that affect the amount, type, and etc of the mafia is the following:

Mafiotismus= personal Power / on the top of Europa state institutions /EU. EC, European courts, European Parliament / state and etc./ + Influence + Connections / to personal, private companies + Interests / personal, private, corporative / + order / orders + Personal management of all state neveaus + Personal Control of all states niveausMafia structure / inside or outside / + Monopolity Riegths + laws / rules / practices / procedures + possibility of taking an alternative decision - obligation - responsibilities - morality / ethics + Personal management and personal control of distribution of public state monetary and other resource (including European funds and funds).

This mafiotismus is a base of the “Financially banking resource-based technological mafia-driven Materialism” developed by Lord Prof. Momtchil Dobrev – Halachev is the base of the European Union, European Commission ad all the European institutions.

5. Hegel, Marx, Lenin, Karl Popper, Huntington, Fukuyama - The Hidden Ideologists of Finanosov Bank Resource- Technological Mafia Materialism of Lord Prof. Momchil Dobrev - Hegel, Marx, Karl Popper, Hentington

5.1. Georg Wilhelm Friedrich Hegel and The criticism of Lord Prof. Momchil Dobrev to Hegel

The original ideologist is Hegel. Hegel says: Conflicts create a story. If conflicts are controlled, managed, and created, what will the story be - induced - generated story. This is stated by Lord Prof. Momchil Dobrev as counterpart and critic of Hegel. Finishers and bankers create organize, plan the beginning - the cause, the place of the end of each conflict. The funding of the conflict - both sides. Existing power is the "thesis" that generates its opposite - "antithesis" The conflict that arises between these two forces creates "synthesis".

The wars represent the synthesis we see according to Hegel's Theory. Wars create benefits - profit, interest. According to the thesis and the intrigue are necessary for the movement of history. The truth is that both the thesis, the antithesis and the synthesis are important for the capital and the fruits of this capital - the profit. The trilateral commission openly admits that solving for war and peace is only taken by a few elite people. All property common source - Hegel. Hegel teaches that the state is God, and the only obligation of the citizens is to serve the state, thus serving God.

Historical dialectics - all historical events emerge from conflicts between opposing forces / thesis and antithesis /, but which are generated by financially resource-based technical mafia-driven materialism, adds Momchil Dobrev. That's the real truth.

Supporter and further developed Hegel's theses, but in our opinion, in a very consciously wrong direction that serves the purposes of financially banking, the technically manipulated materialism is fed to Rothschild Karl Marx - a Jew. Marx and "capital" treat capitalism as a "thesis," communism as "antithesis".

The man who uses Hegel's theses is JM Morgan. JM Morgan studied in 1850 at the Göttingen University in Germany - which center was Hegel's activity. Morgan uses all the parties in his favor. He supports Republicans, Democrats, a Communist Party, and his closest is Julius Hammer, the father of the famous Armand Hammer. The real theory of Hegel and Marx is the glossy cover that has nothing to do with truth and reality. The practice is to manipulate people, left, right, centrists, and others.

One of the most prominent figures of modern history that has given its appreciation of the "laws of history" is Karl Marx. Marx formulated an entirely new historical philosophy that played an important role for billions of people on earth, whom Momchil Dobrev believed to be deliberately misguided and directed at the masses, with the ultimate goal of manipulating capital and bankers and their benefit from wars, conflicts, and so on. Actually, according to Momchil Dobrev, Karl Marx has committed a falsification of history.

The present material proves this - the mistakes and contradictions of Mark and Hegel. Marx is Jewish. He likes to collect huge amounts of information, but only to use it against his opponents. In the beginning he deals with law and poetry. For years he has been following Hegel's footsteps. Marx behaves like a prophet and thinks in Hegelian categories, establishes those, antitheses and synthesis, without ever giving logical evidence. He is subordinate to his teacher Hegel. Makes the same mistakes and adds new mistakes. Opponents get lowered through several high-spirited words. With his pen, he tries to inspire the masses, constantly dreams of revolutions, and escapes extradition from France. Everywhere he sees the flames of the revolution. His predictions almost never happen and come true. Dream and pray for coups and revolutions, but in terms of theory and mafiotizma Financial - Banking Technology Resource mafia materialism Lord Prof. Momchil Dobrev each revyalyutsiya coup and is funded by zainterestovanestrani - ie financiers and bankers.

5.2. Karl Marx and the criticism of Lord Prof. Momchil Dobrev to Karl Marx

The criticism of Lord Prof. Momchil Dobrev to Karl Marx

A truly internationally from the 18th century, financial bank resources technology maffiotised materialism of Lord Prof. Momchil Dobrev is working, not the historical materialism of Karl Marx.

Thesis number 1 - at the beginning was matter. It formulates the principle supremacy of matter without any evidence, and makes conscious misconceptions. Actually based on these theories developed by Lord prof. Momchil Dobrev - cosmological theory, information theory vortex fields Theory and practice of free energy, Theory of information and energy medicine, Theory of the universe, theory and practice of energy informatsonnata genetics , energy-information psychology and energy-information psychiatry, the Spirit-consciousness-the thought is primary. Then is the matter.

Thesis number 2 - bite determines consciousness Ie. The economic conditions / existence / determine the thinking and the personality of an individual / consciousness.

According to the above-mentioned theories of Lord Prof. Momchil Dobrev, the spirit-consciousness-thought determines being, not vice versa. In 1933, Sigmund Freud criticized Marx. Even the insatiable fact that different

people, races and peoples under the same economic conditions behave differently, excludes absolute power from an economic moment. On the basis of this "erroneous" theory, Marx develops his historical materialism that only the economy and the ownership of the means of production are decisive. Historical materialism believes that, ultimately, goods, products, and property determine the course of history, as they promote the social classes.

Created by Lord prof. Momchil Dobrev banking financial resource tehlogichen mafia materialism prove after a full analysis of the history of finance, the economies of countries around the world since the 13th century, the bankers - financiers and generating pszdavayki conflicts, wars and others make history. Ie. Prof. Momchil Dobrev - Halachev's financially-funded, technical, mafia-driven materialism, created by Lord Prof. Momchil Dobrev-Halachev, is the truth, and the historical materialism of Karl Marx is manipulation.

Thesis number 3 - story is a story of class struggles.

Marx really believes that all human history can be reduced to class struggles. Marx sees history only as a history of class struggle, with the exception of prehistory. It distinguishes between individual stages of development. A truly internationally from the 18th century, financial bank resources technology maffiotised materialism of Lord Prof. Momchil Dobrev is working, not the historical materialism of Karl Marx.

Thesis number 4 - the class struggle necessarily leads to the dictatorship of the proletariat, and in the end all classes will be "dashed".

Historical and Financial Evidence of the Financial Banking Resource Technique of Mafiaized Materialism by Lord Prof. Momchil Dobrev.

5.3. Vladimir LENIN and the criticism of Lord Prof. Momchil Dobrev to Lenin

Lenin writes that the only property of matter is to be an objective reality, to exist outside our consciousness.

Matter is a category for characterizing objective reality. Matter is associated with the public form of movement. These definitions include, in opposition, and at the same time, only metiary and consciousness. Lenin emphasized that matter existed until consciousness appeared. Consciousness possessed only a property similar to the saturation, the reflection. Lenin develops a "law on solely and the fight against opposites". Developed the main problems in the theory of knowledge. Lenin developed the doctrine of Marxism about the role of social practice in the theory of knowledge.

Lenin pays attention to the historical approach. It examines thought forms in content only matter and consciousness. Dialectical materialism is based on the recognition, the primacy of matter, and the fact that consciousness follows from matter, the Being of the Mediator is absolute. Being determines consciousness. Matter is uncreatable and non-destructive and infinite. The world is infinite in time and space in the forms of motion of matter. The problem of the attitude of consciousness to matter is a major issue in philosophy.

Three basic laws:

1. Law on unity and the fight against oppositions. This is the basic law of the Methyl-Israel dialectic. Each object contained opposites. By contrast, dialectical materialism means:

1.1. Countries in uninterminable unity

1.2. They are excluding mutual, but not only different but in the same relationship

1.3. Mutuals provide.

There are no opposites that are not in unity, no unity without opposites. The unity of opposites is relatively, temporarily, the struggle of opposites is general. This, according to Prof. Momchil Dobrev, is a reformulation of Hegel's synthesis of thesis and anti-thesis, which represents development. It's the same, but in other words.

Law of prof. Momchil Dobrev-

- Unity, difference and complementation of profitability.

2. The law on the transition of quantitative accumulations in qualitative changes -. One of the fundamental laws of dialectics, He explains how and how movement and development proceed.

Ie the accumulation of inconspicuous, gradual quantitative changes at a certain moment in each process, leads to significant, fundamental, qualitative changes, to a leapfrogging transition of the old quality with a new cast. Here, according to Prof. Momchil Dobrev, that is a transition from quantity (essets in qualitative change is and is on the basis of creation, the emergence of an idea, which is interpreted differently on the basis of new sciences (our and public discoveries - in new ways) the dependences of the functions between the elements - a new way - a new quality way.

3. Rejection disclaimer. One of the basic laws of dialectics.

The law expresses continuity, the connection of the new with the old, the repetition in the higher stage of the development of some properties of the lower stage. . This law justifies the progressive nature of development. In dialectics, the category of negation remains the transformation of one object into another while simultaneously "destroying" the first. But it is such an "annihilation" that opens the space for further development and appears as a moment of connection with the preservation of all the positive content of the past stages. There is really no "destruction". This goes against the first badger. This contradicted the first law.

4. The law of the universal relationship of Phenomena-

5. Statistical and dynamic law.

6. The ideology of Karl Poper and the criticism of Lord Prof. Momchil Dobrev to Karl Poper

Soros's ideological platform is from the great Austrian philosopher and thinker Carl Popper who prefers him in London. The idea of freedom aims to create flexible tools for powerful geopolitical influences in the individual countries of East Europe and the developing world. However, we can not only speak of self-presumption of "freedom" as Carl Popper does if these rights of freedom are not based on legal norms, ethical norms, moral norms and society. Otherwise, freedom becomes infinite and chaos of freedom and chaos for freedom.

According to Carl Popper, truth is not something that is discovered, it is invented. Ie. the truth is always temporary, it remains in force until it is rejected. Truth is in the human spirit, in the imagination and the reason of man,. The truth, according to Popper, is constantly exposed to the cross-fire of trial and experience - trying to "falsify" it as a substitute, as it has been, and inevitably, progress, civilization, will be inevitable in various stages of human development.

At first, according to Popper, truth is a hypothesis or theory that seeks to solve a question. The hypothesis or theory is or must be subjected to trial of "experience and error," to testing or rejecting those who are not convinced. All this has an impact on life, causing changes in medical practice, the military industry, public organizations, sex, and others. Until a new theory suddenly appears and does not "falsify" or reject it. This is Popper's philosophy. It is limited and burdensome.

That truth exists and may have a relative existence does not mean that it is relative. Truth is insecure, so science is vulnerable. But that does not mean that the truth is inaccessible. The existence of truth is evidenced by human progress in all areas: science, technology, society, politics.

Popper turns criticism - ie. the exercise of freedom - the basis of progress. Without criticism, without the possibility to "falsify" all the assurances, there is no progress in science or in the fulfillment of social life. If people do not have the freedom to question and test the validity of all theories that promise some sort of solution to the questions before them. Everything that promotes Popper is a fiction that does not rest on rational intelligence. Then, myths, religious and other exhaustions come to be honored instead of rational truths. Ie. the exercise of freedom is a fundamental right of reason, of culture, of science.

Popper transforms freedom as a prerequisite for man's life. Popper defines the three worlds: the first world is that of things and material objects, the second is the subjective world of thought, and the third is that of the works of the spirit.

The difference between the second and the third is that the second one is built up of the individual's individual subjectivity of the individual, the ideas, the images, the perceptions, the realms, while the products of the third one, though created by the subjectivity, have become public- scientific institutions, legal institutions, ethical principles, art, culture. The birth of the critical spirit breaks the walls of the closed society and exposes the person to a full-blown experience: personal responsibility. Freedom, daughter and mother of rationalism and of the critical spirit is a heavy burden on the shoulders of the human being.

Popper says that with the simultaneous birth of the open society, in which intelligence has replaced the irrational, the individual has become a true person in history, and freedom has begun to displace the former bondage. But here is the criticism of Momchil Dobrev that there can not be just freedom without the legal, ethical, moral norms on which a society is built. No base, no skeins, no foundation, no building collapses. Thus, Popper's theory of decay for a "free open society" collapses. This is a chimera that is used in the wrong direction by Soros and a company.

Soros' ideological platform is from the great Austrian philosopher and thinker Karl Popper, who prefers him to London. Under the idea of freedom, it aims to create flexible tools for powerful geopolitical influences in individual countries in Eastern Europe and the developing world. However, we cannot speak solely and presumptuously of "freedom" as Karl Popper does, unless these freedom rights rest and are not based on legal norms, ethical norms, moral norms on a society. Otherwise, freedom becomes lawlessness and chaos of freedom and chaos of freedom.

According to Karl Popper, truth is not something that is discovered, it is invented. Ie the truth is always temporary, it remains in force until it is rejected. The truth is in the human spirit, in the imagination and the mind of man,. According to Popper, the truth is constantly exposed to the crossfire of trials and trials - trying to "falsify" it to replace it, as has happened, and inevitably, progress will be made in various stages of human development, civilization.

At first, according to Popper, truth is a hypothesis or theory that seeks to solve a question. Prof. Momchil Dobrev gives a solution to his criticism of Karl Popper that the truth must be invented. According to the stage of truth theory. the truth, after certain analyzes and availability of new technological scientific and public discoveries, is revised of the true given.

7. Francis Fukuyama and the criticism of Lord Prof. Momchil Dobrev to Fukuyama

The end-of-Fukuyama theory is a mixture of Hegelian metaphysics and an imitation of evolutionary theory. According to him, the liberal state associated with a market economy is the only possible alternative to communism and the real existence of a society. According to Fukuyama, liberal democracy is what is called the

last form of human rule. For the first time in his book *Identity*, he acknowledges the possibility of liberal democracy falling or regressing. According to him, liberal democracy has not solved the problem of timos, which is part of the soul that desires recognition of its dignity. An isotomy is the desire to be treated equally with other people. And megalothymia - the desire to be recognized as superior to others.

Modern liberal democracies provide a minimum amount of equal respect, human rights, the rule of law. He states that entire countries may feel disregarded, which fuels aggressive nationalism. This is the same for religious believers. Fukuyama makes no distinction as to which religion is just, which religion does not attack other religions, which religion does not respect other regalia, which religion is aggressive against any other faith to explain and seek recognition for recognition. Whether one religion seeks recognition from another religion by recognizing the same religion.

He writes: "There is nothing wrong with identity politics itself. It becomes a problem when the identity is interpreted or maintained in a certain way."

Identity according to Fukuyama. Identity is a "powerful moral idea" It does not recognize borders and cultures. It is based on the universal and universal human psyche. This tells us that we have our authentic inner Self, which is unrecognized. In the surrounding society was repressive and jittery. It sharpens our desire to acknowledge our dignity. That is, providing us with a means by which to express our resentment when recognition is not received. In this is the basis of the protests. It is to direct conflicts of protest on the grounds that one is not praised, that there is no dignity. Fukuyama does not consider the objective conditions for seeking recognition. Fukuyama does not address the objective conditions of whether we can be recognized, who does not allow, who does not. So it is a proclamation of protest, of an uprising to seek dignity, of recognition - of one's identity. Fukuyama mistakenly treats liberal democracy, which gives the individual equal rights, equal freedoms, and restricts only those rights to the right of choice and role in defining his collective political life. It is restricted only to freedom of choice, which is limited and non-directional.

What dignity is - and it has to do with the freedoms, the morals, the moral norms, the principles of statehood, the foundations of the moral ethical rules of a society. And they are at the heart of whether and how recognition and dignity and identity are permissible. Fukuyama views the identity of many as restrictive as a stimulus for protest, for revolution, and others. Fukuyama does an analysis of what freedom is, and what is the framework and minimum elements of liberties that ensure the dignity and recognition of the individual and his or her identity. It is acknowledged as a prerogative for its own sake without considering the legal and moral and ethical framework of a society, it is an end in itself, and is used by individuals and representatives of the Financial Bank Resource - Technological Mafia Materialism such as George Soros. Modernization is described as mobile, complex, flexible, and means constant upheavals and turmoil, as well as opportunities that did not exist before. But freedom and the ability to choose. can make people feel miserable and awakened by other human beings. They can be harassed by leaders who tell them that they have been deceived and humiliated by existing power structures.... "

Loss of status in groups is an end in itself and it is not considered on the objective side whether certain human groups respect the moral ethical rules of a society, why they do not respect them, why what is the basis of this disrespect, the non-recognition of these legal, moral, flow and norms, what is the purpose of this disregard - repression, argesia, terrorism. What is the reason for this disrespect, what are the reasons, the reasons for this disrespect. Modernity implied the existence of a different identity. It is opposition to social groups, to ethnic groups, to human societies, to ethnic groups, to groups, to rhygionzones because they had different identities. Identity is defined by race, gender, workplace, education, preferences and nationality.

This is a very superficial view of identity, as it seeks to divide society consciously into groups of race, gender, stocking, even the workplace - which is a real prerequisite for using these groups for protest purposes, revolutions, the abyss of creating inter-groups in societies, of creating conflicts, of terrorism, and of other aggression. This is stimulated by aggression - to seek the identity of the eu. Without considering whether this identity should conform to the moral ethical legal norms of the development of a community, ie. it is a challenge to protests, terrorism, revolutions, discontent and more. "The freedom and choices that exist in modern liberal societies can make people feel miserable and alienated from other human beings."

However, whether they are giving freedoms and what, to what extent, to whom, whom, what, to what restrictions, how is not analyzed by Fukuyama. What choices are given to people, to what extent, to whom, to what, against what, whether equal opportunities are given, to restrict access to those opportunities. This is not all analyzed by Fukuyama. It is too simple to analyze freedom, opportunity, dignity. A request for recognition by a group without whether that request is made in what legal, ethical moral standards in which society is not analyzed. Too simplistic. I.e. the loss of status is grounds for protest and other actions and activities.

But what is the status, what are the norms in a society and whether they are determinative is not considered consciously by Fukuyama. He even talks about several identities - ie. identity is blurred because it is not viewed through the prism of citizens' rights and freedoms given to them by one society - by the legal moral, ethical norms of that society. (Everything is blurred to seek conflict, ie using identity to divide society, confronting groups of people with so-called% different identities." I.e. identity is formulated as different, different. Blending experiences of values, lusts Experience - Erlebnis blends and merges with Erfahrung, which is incorrectly scientific. These are different.

Mutual respect for dignity is sought without considering the place of man in society in the relevant legal, ethical and moral norms of the respective communion and what legal, moral and ethical norms it defends. I.e. goals are divided into society, by people of identity groups, in order to manage these people through these identities. Identity politics is the division of the commons, the joy; the division of people into groups by my elementary attributes - benefit, age, race, workplace, education, profession.

Promoting the fight for identity recognition - this is the same fight and directing Fukuyama to new forms of chaos and generating wars. Ham cites multiculturalism, chewing and calling for confidence in civic consciousness. It does not look at what kind of purpose the trust is aimed at. That is why Prof. Dr. Momchil Dobrev Dobrev was born in 1991. creates a Theory of Trust.

Fukuyama views civil liberties and citizenship laws as too limited as a basis for identity. It seeks to respect the fundamental principles of liberal democracy and to displace citizenship laws in individual Member States. I.e. Citizenship laws are the only necessary Fukuyama identity. Fukuyama highlights the problem of privileging some ethnic groups at the expense of other groups. I.e. it is not considered grounded in a community - the legal moral, ethical norm and framework of a society, but it seeks to distinguish, divide, differentiate groups from ethnic groups. This is the real purpose of the conflict, the protection of ethnic groups. I.e. it is fundamentally about citizenship laws, not respect, enforcement, or the laws of a society.

What has been written is that different nations have different identities, which leads to different goals and interests, the purpose is conflict between different nations and peoples. Fukuyama provides guidance on how European countries change their identities is a barrier to ethnic origin. I.e. the purpose is to create different identities, to create such identities, which then contradict other identities, to enter into conflict, into confrontation.

And it focuses on ideological identity. This is where the reasoning is mixed, i.e. Equal opportunities. Provided assimilation guidance to begin in the US with education. Too simple to consider citizenship is the right to vote, not the other obligations to this community. It obliges us to owe refugees, understanding, sympathy, and support. But this obligation must also be on the other hand, - when required to respect the laws, the legal moral and current norms of society. Too one-sided viewing. Not every request for a simple look at the immigrant problem is called Fukuyama racism. Inequality. Respect and dignity are considered too simplistic by Fukuyama. The term "identity politics" is used to create conflicts between ethnic groups, and not to analyze the entitlements and obligations given.

Freedom is not only a right, but also a duty for every person to live in a community. It is no coincidence that Karl Popper views liberty too simply. Fukuyama does not consider that arrogance also means obligations, and these obligations must be fulfilled by the appropriate group with the appropriate "identity". i.e. Emphasis is placed on "identity" and not on the rights and obligations under certain freedoms in a society. i.e. the loss of dignity is A Is a society able to respect, recognize, to what extent, how, why the dignity of an individual or a group of individuals, but considering Dignity without analyzing it in a set of freedoms with their rights and obligations is too simplistic and does not produce any real results.

Fukuyama did not consider whether the information was accessible to everyone, how, why, to what extent, or not. Fukuyama looked too limited at the revolutions in Georgia, the Orange Revolution, the Green Revolution in Iran, and the Orange Revolutions in the African countries are all too simplistic. Lord Prof. Dr. Momchil Dobrev analyzed and proved the reasons, the reasons for these revolutions, who caused them, for what purposes, for what reasons, for what purposes, for what influence, for what influence, for what invasion of the respective economies and political lives. The services are being privatized.

Lord Prof. Dr. Momchil Dobrev proved the existence of the financial bank resource technological mafia materialism, and that What is mafia, its representatives. Too simplistic, Fukuyama talks about the third part of the soul. Fukuyama blends the soul too easily, with gender, ethnicity. Fukuyama claims that his idea for the end of the story is not understood, one of He claims that it is not the final end, but the end. After Lord Prof. Momchil Dobrev understands the fluff and dust of Karl Marx's historical materialism and proved that this is not the abjective law for the development of a society, but everything is organized by a representative of the bank's financial technology mafia materialism with the ultimate in they make money.

Fukuyama argues that liberal democracy is what he calls "the last form of human rule." Liberal democracy, on the other hand, has proved unfit for development in a civilization. He now acknowledges the possibility of liberal democracies "falling or regressing". Liberland Edemocrats did not resolve the thymosity problem. According to Fuyama, timos is the part of the soul that seeks recognition of dignity. There is no opportunity for recognition. For Fukuyama, liberal democracy has become an alternative to the West. Fukuyama says democracy is needed by the elites.

8. Samuel P. Huntington and the criticism of Lord Prof. Momchil Dobrev to Huntington

The nature of the warriors along the fault line. According to him, wars occur locally or globally. At the local level, there are conflicts along the fault line between neighboring countries from different civilizations, between different civilization groups within the borders of one country, and between groups seeking to build new states such as Yugoslavia and the former Soviet Union.

At the global level, conflicts between the core states of the various civilizations have been called for. It actually uses telma civilization to denote one. This is according to his paradigm "clash of civilizations". He disputes the

finalized history of Francis Fukuyama. Problems of Geopolitical and Sociocultural Issues in his book "The Clash of Civilizations and the Rebirth of the World Order The Clash of Civilizations and the Remaking of the World Order 1996.

He substantiated his thesis that after the end of the Cold War, supranational cultural and religious identities would become major source of conflict. The term civilizations appeared before 1926. in the book examining the Middle East, by Basil Mathews, Yung Islam of Trek - This term is derived from the clash of cultures,. the term is also used by Bernard Lewis in the article "The Roots of Muslim Anger" published in September 1990 in "The Atlantic Monthly- Cold peace, cold war, trade war, quasi-military, difficult peace, strained relations, fierce rivalry, competition, arms race. He makes his judgments when examining the various theories and the nature of global politics in the aftermath of the Cold War. Human rights, liberal democracy and the capitalist economy are the only ideological alternatives to post-Cold War nations.

Huntington believes that the era of ideology is over, the world is back to normal, characterized by cultural conflict. In His thesis that the main axis of conflict in the future will be along the lines of the cultural and religious faults. Different civilizations have different identities. Following the predominantly proposed construct of Oswald Spengler and Arnold Toynbee, Huntington states that "human history is the history of civilizations." He also classifies the types of civilizations as follows:

- Western civilization / based on Catholicism and Protestantism
- Islamic civilization
- Hindu civilization
- Chinese civilization / based on Buddhism /
- Japanese civilization / Shinto-based
- Latin American civilization / based on Catholicism and local traditions
- Orthodox civilization
- African civilization

Every civilian wants to maintain its identity. Most civilizations have a core state that is dominant and organizes other states in the civilization community. According to him, every civilization seeks to preserve its identity, and in many cases to extend its sphere of influence. According to Huntington, the 21st century will be an era of inter-civilizational clashes or conflicts.

In reality, this is a change in the nature and causes of a particular war - be it the Cold War, the trade war, war, or other. There is a blurring of the true causes and the foundations of a war, be it and whatever its form. There is no real search for the causes of war for the ultimate purpose of gaining resources, securing flows. This is too simplistic to consider the causes of a war. Talk about fault characteristics along the fault line.

First, community wars are fought between ethnic, religious, racial, or linguistic groups. Since yakao religion is the main defining characteristic of any civilization, wars are always fought between peoples from different regions. This is a replacement of the truth about who and for what reasons a war is coming. What are the motives, what are the reasons for a war, whether and who creates the occasion to provoke war.

The most elemental thing is to cause conflict between different religions to use to provoke war. Or create a front and a war by creating a military base on a religious basis such as that of the ISIL, created by the CIA and aided by the CIA for conflict in Syria, Libya and other countries. The creation of ISIL is for the regional purpose of securing and putting a hand in possession and the pipelines from Central Asia to the Mediterranean and to the Black Sea.

This is a replacement of the essence of waging war. 2001 saw the emergence of the new enemy of the United States and representatives of the Financial - Banking Resource Technology Mafia MATERIALISM, and a war on terror was waged. Profit from the war on terror, previously created by the United States and the CIA, The subsequent wars - the Orange Revolution, the war in Syria, Yugoslavia, and others - is designed to give leadership over these countries the leadership of leaders. and individuals of the representatives of this Materialism in order to conquer markets, resources, technologies and profits from consumption and trade in these countries. The ensuing US trade wars, US sanctions against Russia and other countries are a real manifestation of these goals and aspirations - for the profits of the representatives of FBIHM Materialism.

All those of Huntington break down to dust and dust from the theory of Mafioticism of Lord Prof. Momchil Dobrev and of the Financial - Resource Banking Technology Mafia Materialism. The very creation of the European Union is such a realization of the representatives of this FBIHM Materialism. The new world system according to Rockefeller March 20, 1969. The realities are other - replacing the system of wars with the creation of terrorism, another enemy - Islamism, and the other way - the Soros system of conquering states, governments, states, societies - entire societies, not their resources.

Planned Parenthood-Reducing the population, childbirth permits, new implications for the meaning of sex, sex without reproduction, the possibility of universally receiving protection, sexual education among young people as a tool for world government, assisting abortions with public funds to reduce the population, helping homosexuality, non-exotic reproduction technologies, family breakthroughs, euthanasia and death pills, organized to access paid health care for getting rid of an insane s, strict control of access to medical services, elimination of private doctors, difficulties in diagnosing new incurable diseases, obstruction of treatment to reduce the population, launching a counter attack to eliminate people, early school education to accelerate puberty and evolution , merges all regions, abolishes old religions, change the Bible, revise key words, school education as a tool for indoctrination, lengthening school hours, without children e learning something, controlling access to information, schools like community centers, seizing certain books from libraries, legal changes that unleash social and moral chaos, promoting drug consumption to create an atmosphere of urban jungle, promoting the consumption of alcohol, restriction on leisure travel, the need for more prisons, the use of hospitals as isolation points, the creation of psychobogic and physical impotence, the use of crime to manage limiting American industrial domination, displacement of peoples and economics, rooting out social roots, sports for society, sex and violence in entertainment, implantation of identification cards / microchips / food controls, atmospheric control, atmospheric control getting to know people's behavior in order to inspire what is being called, to falsify scientific discovery, to use terrorism as a basis for control. Television that observes a person from a distance, ownership of property goes into oblivion, the advent of a new notary system. These are the imaginary goals - the real goals for fulfilling the goals of the financial banking resource technological mafotiated materialism.

9. The new strategy to profit from military conflicts and wars in the 21st century, from creating chaos in countries, entire nations, entire unions

Replacing the Cold War and generating and financing terrorism and then fighting it. Artificially triggered acts of terrorism, in order to justify tightening control and, accordingly, to provoke war, military conflict, intervention in a foreign country, Atomic Bombs,

Staging terrorism - which only serves to intimidate people and impose strict controls. The realities are different - replacing the system of wars with the creation of terrorism, another enemy – Islamism. These are the imaginary goals - the real goals for fulfilling the goals of the financial banking resource technological mafotiated materialism.

Money is most important in history and revolutions with the backwoods of states. Quoting from Thomas Jefferson – “if one day the American people cedes to private banks the control of monetary” production, “they, along with the enterprises that will be born around them, will rob people's property first by inflation and then by deflation. Until one day their children wake up without a roof over their heads on the continent conquered by their fathers”

10. Historical and financial evidence of the financially banking resource technological mafia materialism of Lord Prof. Momchil Dobrev

Historical overview and evidence of the above:

On August 15, 1871, Pike abandoned his plan to conquer the world through the three world wars before the Illuminati leader Maczini.

World War I - a staging to destroy tsarist Russia because of its vast resources and to fall under the direct control of the bankers who are interested in the resources - especially oil and metals. World War II increased Russian influence and the establishment of the State of Israel in Palestine. For the next war. The main reason for the First World War is the deliberate indebtedness of the economy. World War I and the Treaty of Versailles - cause the Second World War, - Germany's over-indebtedness to the winners of World War I. Through war, always a country is divided into two countries. But the same country finances the two countries and actually manages the policy of the whole country, owns the industry, raw materials, and more.

10.1. The American Civil War 1861-1865

In the American Civil War of 1861-1865. The northern states that are against slavery are fighting the southern states, advocates of slavery. The Rothschild Bank in London finances the northern states and the Rothschild Paris Bank finances the southern states. Through war, always a country is divided into two countries. But the same country finances the two countries and actually manages the policy of the whole country, owns the industry, raw materials, and more.

10.2. War and oil

The beginning of the oil empires dates back to John D. Rockefeller. In 1870 Creates Standard Oil 1882 is the first trust. / uniting multiple companies under one leadership. The shareholders of forty American companies sign a contract and entrust their shares to a supervisory board of nine men. 1890 The government issues the first antitrust law Rockefeller relocates the bulk of the company abroad.

Rockefeller meets the competition of Royal Dutch Shell formed by the merger of the Dutch Royal Dutch and the English The Shell Transport and trading company. It holds the exclusive rights to all oil concessions in the Netherlands, Eastern India, Persia and Iraq. And the deposits in the Middle East.

In the late 19th century a remarkable oil industry developed in Russia. The Baku oil fields are in the hands of Swedes Robert and Ludwig Nobel. Russian oil production amounted to 1874. At 600,000 barrels, after ten gozies, it reaches 10.8 million barrels, about one-third of American production. Bunge and Palashowski oil contractors built, with the financial assistance of Rothschild, the rail line from Baku to Batumi on the Black Sea - a port of the most important oil port.

In 1886 The Rothschilds founded the Caspian and Black Sea Caspian and Black Sea Oil Company. The distribution is between the four companies - Standard Oil Royal Dutch Shell Detergent, Nobel Brothers and Rothschild.

The wars in Afghanistan and Iraq are oil.

"The British Navy is moving from coal to oil. 1905 You are staying in Persia. Germany is concentrating its interests on Turkish oil reserves in present-day Iraq. The Baghdad Railway is under construction. German companies are entitled to use all oil reserves within a radius of up to twenty kilometers from the railway line. Deliveries to Germany are secured and cannot be threatened by the UK's maritime blockades.

Berlin to Baghdad railway For the British this is a strategic threat. For the British, there is only one small strip - Serbia prevents the end of the Berlin Berlin - Baghdad. That is the reason - the Shots of Sarajevo.

10.3 Establishment of the Federal Reserve in 1913

The creation of the Federal Reserve, a private institution that can print US dollars and actually control finances around the world. In the United States in 1913 was sued the Federal Reserve. The largest owners of Fed shares are:

- Rothschild Banks of London and Paris
- Lazard Brother Bank from Paris
- Israel Moses Seif Bank from Italy
- Warburg Bank from Amsterdam and Hamburg
- Lehmann Bank from New York
- Khun Loeb Bank from New York
- Chase Manhattan Bank from New York
- Goldman Sachs Bank from New York

The value of banknotes printed by the Federal Reserve is 50-70 cents. The circulation of banknotes issued by the Federal Reserve is 263 billion by 2002. US debt alone exceeds \$ 4 trillion by 2002. The Fed is a private institution. With the Federal Reserve, the United States has been thrown into utopian sovereign debt by bankers. Interest payments are guaranteed through tax revenue. Where they cannot be paid, it is a transfer of their own

10.4. Germany before the First World War

The unification of German states under Bismarck's rule breaks the "balance of power" that has existed for more than two centuries in Europe. Until 1871, England was the master of the European continent. Turning Germany into a strong country is a threat to England. The rise is thanks to the "Iron Chancellor" Otto von Bismarck. In 1871. He was proclaimed Germany's first chancellor. In his reign, he defeated Austria and over the French in the Battle of Sedan.

After 1884, Germany acquired many colonies in Africa, Germany encouraged the storms in Transwald and the Free State of Iran until the war with England from 1889 to 1902. Until 1902, Germany acquires in the Pacific the Carolinas, Marshall Islands and Marianas, parts of New Guinea, and Samoa, as well as a naval and trading base in Shandong, China. International banking is also driven by the influx of Germany and seeks to isolate and control the country. For this reason, between 1894 and 1907, it was agreed that Russia France and Anglia and other countries would unite the screaming Germany in case of war.

10.5. The struggle of raw materials - oil

In just a few years, weapons production has made a huge spike in production, it is about tank aircraft, fuel supply, optimization of land and sea transport. The battle for black gold is at the heart of the two world wars.

10.6. First World War

German guns are more punctual than Russians. Russia's entry into the war is a disaster - it's no accident. Although Britain guarantees full support for Russia after the war, England cuts its aid to Russia 10 times under the treaty. This is not accidental. Only 1915 to 1916. Russia is losing millions of soldiers on the Eastern Front. Six soldiers had one shotgun.

10.7 The October Revolution in Russia

The arsonist of the Russian Revolution - Jacob Schiff. Born 1847 In Frankfurt am Main he grew up in the neighborhood of the Rothschild family. 1865 He left for New York where in 1875. He started working at the Kun Liuob & Co Bank in 1885 and became its director - this was commissioned by Rothschild. Kun and Schiff are members of the lodge. The US financial circles have been sworn enemies of the tsarist regime in Russia for years, 1904 Schiff wrote to Rothschild that in the last 5-6 years he had thwarted loans to Russia.

11. Washing of purposes, fighting of purposes of nations and nations through those directed foreign investments by the member states of the European Union - representatives of the financial bank resource technology mafiotherized materialism

Such foreign investment should not be reported in the Gross Domestic Product indicator because fraudulent results are obtained that do not reflect reality. Real such foreign investments should be taken into account only in terms of the employed labor force and the corresponding amount of remuneration for their work. Only this should be factually taken into account in the country's gross domestic product. The liberalization of commodity flows is not beneficial to Eastern European citizens. By comparison, the prices of goods and food in Bulgaria are between 25% and 34% higher than those of the same goods and foodstuffs in Germany. This liberalization and especially for the member states. With open borders, goods can be formally exported to both countries, and they are actually doing so because they are more competitive in terms of quality and commodity prices. New countries make deficits in trade balances. They are forced to reduce or close down their entire production and industry, Imports of more competitive goods from Western countries. Ie. followed by the destruction of many productions Asymmetric liberalization of movement of goods, capital and people between member states. The liberalization of commodity flows is not beneficial to Eastern European citizens. By comparison, the prices of goods and food in Bulgaria are between 25% and 34% higher than those of the same goods and foodstuffs in Germany. This liberalization and especially for the member states.

With open borders, goods can be formally exported to both countries, and they are actually doing so because they are more competitive in terms of quality and commodity prices. New countries make deficits in trade balances. They are forced to reduce or close down their entire production and industry. Imports of more competitive goods from Western countries. Ie. followed by the destruction of many productions. Liberalization of capital flows - to launder money in the new accession countries - through foreign direct investment.

Foreign direct investment is in four directions: - buying and speculative trading in real estate, trade and repair of motor vehicles and motorcycles, hotels and restaurants, and financial intermediation. No country from such FDI has prospered. Ie. embezzlement of national income created in Bulgaria is obtained. When receiving funds from the different EU funds, they return to developed European countries in the form of consultancy services, their experts, research and design of the relevant sites by their experts, production and design of the relevant sites by their design institutions, the delivery of machines and facilities by their manufacturers, building their sites, launching them with the help of their specialists.

The balance of the unsymmetrical liberalization of goods, capital and people is heavily negative. The common European market has contradictions. Liberalization of the common market is advantageous for strong and highly technologically advanced countries and disadvantageous for underdeveloped EU Member States. In addition, all important decisions of the European Union are taken directly by the United States and not by the strong countries in the European Union. The main ones for Europe are taken by the US and they are imposed through 2-3 larger countries in the EU.

These are the decisions about the bombing of Libya, the war on Iraq, the participation in the Arab Spring, the wars against Afghanistan, the war against Syria, the coup in Ukraine, the economic sanctions against Russia. Solidarity is the obligation and the taking of the negatives of the strong in Europe. The single currency is the imposition of financial frameworks for all participants in Europe of all EU member states.

An analysis of 368 investments made by foreign and Bulgarian companies has been carried out. There are indisputable laws that prove that:

Foreign investments of foreign companies on the territory of Bulgaria are solely for the purpose of using only and especially the cheap labor, for creating competitive advantages, for money laundering, for production of low cost products.

The real purpose of these foreign investments is the following:

1). Construction of production capacity

Purchase of land, Construction of a factory with the corresponding infrastructure, Equipment of this factory with the corresponding equipment. Like the investment to buy the land, the construction of the factory and the equipment represent loans from the parent company to the daughter company. Using transfer pricing to obtain low cost and export price. The goal of 100 percent export of the production to the parent company. Achievement of profits controlled and managed by the parent company on the respective domestic and foreign markets of the parent company.

2). Construction of chains of stores or logistics centers for the sale of goods and services, purchase of land, construction of the respective chain, equipment of this chain. Use of the import and sales chain of goods from foreign producers from the European Union. Since in Bulgaria there are no requirements to sell over 50-80 percent of the products produced in Bulgaria in these chains, then by importing products from the parent company - real turnover is achieved and the sale of the goods is even higher than the prices on foreign markets.

Branches using the above two schemes.

At the first point, this applies to production capacities producing electrical materials, electrical cables, electrical equipment, electric generators, complete electrical equipment for cars, production of white goods, household appliances, mattress production, production of furniture, production of wooden springs, production of automotive cables, electric motor vehicle automation, automotive air conditioning installations, production of automobile coils, production of machine parts, production of some wires, automobile upholstery production, automotive glass production, headlights, and more. The whole palette of outsourcing services.

The second point applies to food chains, gas station circuits, a chain of brokerage offices for the sale of real estate, chains of wholesalers of electrical machines, real estate equipment, building materials. In fact, however, both have the following actions:

the parent companies take the money to the firms - daughters to buy the property, build the buildings concerned, furnish the buildings concerned, purchase loans for the goods and services that will be offered for sale in the respective chains.

The conclusion is as follows: These investments can not really be considered as investments because all the loans are returned with the corresponding interest rates above the market to the mother companies.

As a result, the cheap labor is actually used. Recognizing these "investments" as part of a country's gross domestic product - in this case Bulgaria - is economically unfair. In fact, these are money-laundering actions by the parent company to the daughter company about doing the whole business. Globalization and liberalization actually support this money laundering. Asymmetric liberalization of movement of goods, capital and people between member states.

There is a different structure of GDP - a different structure of domestic demand, household consumption, collective consumption, investment consumption. Germany enjoys growth due to high competitiveness and net exports. So surpluses accumulate in the German balance of payments. In the southern and eastern countries, deficits accumulate, which suppresses their growth.

12. Conclusion

Hegel, Marx, Lenin, Popper, Huntington, and Fukuyama are the real ideologues of Prof. Momchil Doblrev's representative of Financial Banking Technology Mafia Materialism.
