

Principles for the capture of entire nations and states by the representatives of Prof. Momchil Dobrev, “Financial Banking Recourse Technological Mafia – driven materialism” through the actions of the International Monetary Fund and the World Bank

Lord Prof. Momtchil Dobrev, Prof. Mariola Garibova, Alexander Gariboff & Mariika Dobreva
Scientific Research Institute Dobrev & Halachev JSC. Sofia, Bulgaria

Abstract

Lord Prof PhD Momtchil Dobrev-Halachev developed in 2010 “Financially banking resource-based technological mafia-driven materialism” as a base principle materialismus since more than 17 century. In 2008 “Theory of generating of crises”, 2010 “Theory and praxice of the Mafiotismus” and 2001 “Theory of the mafia”. Based on these theories this paper explains the principles of enslavement of entire nations, countries, peoples by the actions of the International Monetary Fund and the World Bank.

Key words: *Mafiotismus, IMF, World Bank, Crisis, theory, finance.*

1. Introduction

In the year 2010, Lord Prof. Momtchil Dobrev developed the “Theory of Mafiotismus” as a new state niveaou based on private and personal interests of the prime-minister, ministers, government. Based on this “Theory of Mafiotismus” Lord Prof. Momtchil Dobrev developed 2010 the “Financially banking resource-based technological mafia-driven materialism” as a based principle materialismus since more than 17 century.

In the year 2001, Lord Prof. Momtchil Dobrev developed the Theory of the mafia and Theory of corruption. All the both theories have been developed by analyzing of the mafia and the corruption all over the world. In Bulgaria, Germany, European Union, and other countires.

In the year 2008, Lord Prof. Momtchil Dobrev developed the "Theory of generating crises". The theory of generating crises has been developed by analyzing all the relationships between countries, and lysing the causes and consequences of crises. The theory examines all possible options for generating crises.

In this paper, we described the activities of International Monetary Fund and World Bank supporting the representatives of the Prof. Momtchil Dobrev “Financial Banking Resource technological mafia driven materialismus” in enslavement of nations, countries.

1.1 Introduce the Problem

The problem of the real goals and actions of the International Monetary Fund and the World Bank in capturing entire nations, nations, countries is enormous. Revealing the real goals, actions of the IMF and the World Bank to the benefit of the representatives of the Financial Bank Resource Technological Mafia Materialism and securing them huge profits in the process of enslavement of nations, nations, states is essential. The truth must ultimately come out and be described with facts and evidence.

The developed by Lord Prof. Dr. Momchil Dobrev Financially banking resource-based technological mafia-driven materialism covers the real process in all countries, nations, states, all over the world. The conclusions of the principles of Financially banking resource-based technological mafia-driven materialism developed by Lord Prof. Dr. Momchil Dobrev covers the real sources and the power and the people who govern the politics, the nations, the states all over the world. The relationship between the IRF and the World Bank's actions with the FBI representatives of Financial Banking Resource Technological mafia-driven Materialism is clear and proven.

2. Research Methods

Research methods of occurrence of Financially banking resource-based technological mafia-driven materialism and the mafiotismus, its logic of work, of existence, of management and its execution by activities of the International Monetary Fund and the World Bank are the following:

- Analysis of the history
- Analysis of the activities of the IMF and World Bank all over the world
- Analysis if the ways of the financing of these wars and revolutions
- Analysis of the people, crises, institutions that are driven all the processes by IMF and WB
- Analysis of the real process in beginning wars, the process of the wars and the revolutions, the financing of the parts participants in the wars and revolutions.
- Analysis of the laws of one country.
- Analysis of all authorities in one country - judicial, legislative, executive
- Analysis of the implementation of the laws of a country
- Analysis of management of public affairs
- Analysis of the existence and / or presence of civil society.
- Analysis of the social directions of development of a society
- Analysis of the judiciary - laws, judges, choice of judges, development of judges, violations of judges, disciplinary and other liability of judges, prosecutors, investigators.
- Analysis of the establishment of the USA.

3. Principles of the Financially banking resource-based technological mafia-driven materialismus, The actions of George Soros based on the Prof. Momtchil Dobrev’s “Financial Banking Resource-Technologically Mafia- driven Materialismus” and the Real Theory of Open Society of Carl Popper and PRINCIPLES of creating the European Union of the mafiotismus and of the financial bank respiration techno-materialised materialism

3.1. The principles of the Financially banking resource-based technological mafia-driven materialismus

The only purpose is the profit and enslavement of peoples, states, governments, creation of monopolies. Participating countries - banks, financial institutions, companies - oil, resources, steel, oil, food, medicines, fuels. Finance and money determine politics, wars, peace.

Primary goal and approach: Central bank formation in the major countries to control not only finance, but also economic activity and politics. These central banks will be governed by governments, states, parties, citizens, a whole territory, in terms of money, investment, resources, use, in whose behalf and for what.

These are the initial steps. Establishment of central banks in the major countries in fact to control not only finance but also economic activity. Establishment of central banks in countries owned by private individuals and private banks. This controls the economies of these countries, governments of these countries, citizens, over entire societies. Where central private banks are not allowed to be created in the countries - it is the occasion to generate civil wars, wars between states, trigger "revolutions" - to finance them from the bank-financial resources technological capital.

Creating conditions for destabilization of the country concerned, importing corruption, provoking a civil war, provoking war, creating conditions for the maturing of an economic crisis, leading to the destabilization of the political power in the country. Generating and provoking wars, conflicts, fickle confessions, financing both the warring parties with loans - with the ultimate goal of profit, debt, then giving credit for the recovery of these states, lending to rebuild the economies of the warring states, shunning companies managing resources - oil, gold, trade, medicines, food, creating a military situation - unlocking - an institutional occasion.

System: Funding both sides to wage war between them. Practical parties are indebted to banks, then banks and financial institutions finance the recovery of their economies. Profits are enormous. The profit rate for weapons and ammunition is the highest and most rapidly recoverable and revamped. They finance supplies of weapons, ammunition, food, clothing, ammunition, extra equipment, they actually manage the war process - when there is an advantage for one side, for the other. Realistically with supplies of weapons, ammunition, they manage the process of war - which side takes precedence and when and for how long.

The Goal: Government control - not only through finances, but also by building up faithful government and state subjects - from universities, world institutions, clubs, lodges, foundations, which then either become presidents, prime ministers, ministers, leaders and important institutions.

Control of security services and control of compromise

Control of whole countries

Through debt securities control of governments, states

Money control, their circulation, movement, direction, direction

Policy control and policies, Press control, Policy control

Control of the Masonic lodges

Purpose and purpose of war, military conflict, aggression - profit.

Control and avoid the introduction of technology.

Control and prevent the production of technology and free energy to be enjoyed by all people and peoples.

Control of patents that contribute to the development of civilization, not to see the world, to be forgotten, not to be used

Control and liquidation of scientists who have created innovative solutions for the benefit of humanity in science, technology, and treatment

Control and avoidance of the production of treatments for the treatment of lethal diseases

Import and export of corruption in one country to its destabilization

Imports of terrorism

Export and import of mafia principles in one country

Debt economy, money control. A person who controls money controls states, societies, peoples, governments

Manifestation of the masses, peoples, personalities

Personality control, with debit, credit cards, mobile phones, mobile applications - uninterrupted control

Civil Society Control through Foundations - NGOs to Replace Public Opinion, Funding to Control and Manage Society

Command not all resources of the earth, oil, gold, silver, uranium and income from them

Managing the population through illnesses

Management of the population through pollution of the environment

Technology management, when technology is being introduced into a conversion, why not, keep another, disappear

Private repositories of tremendous wealth

Crisis Generation - Any, Economic, Currency, Social, Refugee, Conflict, War Political Crisis. The financial crisis occurs the fastest, the currency crisis occurs instantly, They are followed by economic crises, Part of the financial crisis and one kind of it is the currency crisis. There is a financial crisis. There are always economic crises.

World currency controlled by members.

Crisis generation schemes:

- Invocation of wars
- Invocation of military conflicts
- Call for military intervention in a country
- Import and export of corruption, mafia,
- Tracking money out of circulation, it immediately creates economic crises. In turn, they cause huge damage to whole countries. Accordingly, he gets loans.
- Crisis crisis - caused - creates economic, social, demographic, social, political crises.
- Inviting the Financial Crisis
- Inviting the Currency Crisis
- Inviting Economic Crises
- The call for an otic crisis - not always last
- Increase of deficit - for the purpose of signing
- World wars become redundant due to the danger of nuclear exchange, so terrorism will be used.
- Managing the population through fear. Planting fear among the population.
- Creating an antipode - through fear, manipulation,
- Creating an intrigue machine
- Creating a machine for seeming occasions - for wars, conflicts, aggressions, diversions,
- Induction of inflation and deflation afterwards
- Creating antipodes - with the ultimate goal of the Cold War battle - generates huge profits, enormous cash flows,
- Possession of resources
- The machine of intrigue and compromise and the creation of fake occasions.
- Generating, financing and combating terrorism.

3.2. The actions of George Soros based on the Prof. Momtchil DObrev's "Financial Banking Resource-Technologically Mafia- driven Materialismus" and the Real Theory of Open Society of Carl Popper

The principal scheme of George Soros work is as follows:

The goals of George Soros are as follows:

Destabilization - chaos of one country, a whole system, inside - without war

Destabilization - chaos in economic direction

Destabilizers - a chaos of society

Destabilization - a chaos of civil society

Destabilization of the currency

The destabilization of the economy

Destabilization - anxiety in education

Breaking the moral norms of a society

Breaking the ethical norms of a society

Crisis management - with the ultimate goal of profit - speculative profit

Destabilization - of a society at all levels using - ethnicity, religion

All this without War

Governing a country, whole countries, - in the case of the European Union, with the ultimate goal of profit -

Managing a state at all levels through its close and faithful people

Demoralizing one community

Replace civil society with its structures to replace the real Citizenship

Financing and support of media - television, newspapers, magazines, etc

Financing political parties for the purpose of getting power and using them

Financing of individuals who will be useful in the future for its purposes - social scientists, political scientists, politicians, scientists, historians, of all classes

Generating crises by George Soros

Approach:

Establishment of non-governmental organizations in all countries

Establish any institutes like NGOs

Creating any unions - judges, prosecutors, investigators, scientists, sociologists, political scientists,

Creating Institutes -

Funding these NGOs

Funding these institutes

Financing of specific persons - politicians, political scientists, sociologists, scientists, analysts, government

It finances revolutions in racist countries

Funding refugee waves

It funded protest-taking regimes in Africa

Finalizing events with the aim of destroying countries with the seizure of their raw materials and resources.

Expansion of the borders of the government-controlled countries

Introducing the use of marijuana, orthokids for medical purposes

According to Professor Robinson, Weizop's program is as follows:

1. Destroy all peacekeepers.

2. Removal of legacy
3. Removal of private ownership
4. Removing patriotism
5. Destruction of the population
6. Removal of religion
7. Establishing a world government

In fact, with his actions and results from his work, Soros proves that he is working on this program.

3.2.1. Soros crisis generation schemes

Crisis generation schemes:

- Privacy of chaos in one country - political, economic.
- Import and export of corruption, mafia,
- Tracking money out of circulation, it immediately creates economic crises. In turn, they cause huge damage to whole countries. Accordingly, he gets loans.
- Crisis crisis - caused - creates economic, social, demographic, social, political crises.
- Inviting the Financial Crisis
- Inviting the Currency Crisis
- Inviting Economic Crises
- The call for an otic crisis - not always last
- Increase of deficit - for the purpose of signing
- World wars become redundant due to the danger of nuclear exchange, so we will use the creation of the HHS in whole countries.
- Creating an intrigue machine
- Creating a machine for seeming occasions - for wars, conflicts, aggressions, diversions,
- Induction of inflation and deflation afterwards
- Not the resources
- The machine of intrigue and compromise and the creation of fake occasions.
- Generating, financing and combating terrorism.
- Generating the WAVE WAVE and the profit from it.
- Generation of "Democratic Revolution" - Yellow Revolution and others in different sidelines - and use of chaos to penetrate certain companies to still country materials - the example of Libya and other countries.

The Soros scheme (Györ Schwartz) for entry in countries and the establishment of parallel structures

The Open Society as a concept, as a system in the work of the Soros. About Soros The open society is what opposes isolationism and unitary thinking, that is, of "totalitarianism". Soros adopts the ideology of Carl Popper, who, in 1945, publishes its books on Open Society and its enemies. Soros created the foundation of the Open Society Foundation in the early 1980s in former socialist countries. This begins in his native Ugaria. It attracts dissident people, the opening of Hungary to the West accelerates the fall of the Burlinska wall.

3.3. Principles of creating the European Union of the Mafiotismus and of the financial bank respiration techno-materialised materialism

The European Union is a project of the representatives of the "financial - bank resource technology maffiotised materialism".

Objectives for the establishment of the European Union

Controlling and managing all the countries of Europe through an organization
Establishment and control and management of an organization that is supranational, according to which decisions all countries should comply
Introducing a single currency for Europe
Consumption control and management across Europe
Market control and management in Europe
Controlling and managing consumer markets and maximizing profits in Europe
Controlling and managing nations, peoples, consumption in Europe
Controlling and managing income distribution in Europe
Investment Control and Management in Europe
Controlling and managing the movement of money in Europe
Controlling and managing the banking and financial system across Europe through one institution - the European Central Bank
Controlling and managing consumer markets and maximizing profits in Europe
Controlling and Managing Industries in Europe
Control and management of industrial production in Europe
Control and Management of All Industries in Europe
Control and management of health systems in Europe
Controlling and managing education in Europe
Controlling and managing pharmaceuticals and maximizing profits in Europe
Control and management of the demographic process
Control and management of immigration processes in Europe

Principles of operation creation and control and management of the European Union

Establishing an alliance of states with the ultimate goal of being able to manage more easily from one place, from one governing body, to control, to make dependent financial, market, investment, production, military, resource, industrial, with the ultimate goal profits at any level
Extending and creating markets for their products, in particular to Germany France. After all, profits return to Germany, France, Italy, the Netherlands.
Expanding and creating markets for their food producers from Germany France, Italy,
Create double standards for food sold in Germany and another standard sold in Bulgaria.
Expanding markets for sale to their producers of meat, cheese, pastries, all kinds of products.
Create markets for selling their tools for home use as well as for German business specialists
Establishing conditions for bankruptcies of enterprises of the respective small country.
Creating conditions for foreign investments - real money laundering, export of income, export of products, making profits outside the country where the investment is made. The cheap labor is actually used, in the country where it is put to expansion, no profit is made in this country, no taxes are paid, the profits go to the parent companies in Germany, France, USA and others. Establishing conditions for the entry of their chains for the sale of food and other goods in the countries that have been admitted to EU expansion, money laundering, sale of goods, services of the countries of the mother companies mainly from Germany, France and others, hiding profits, exporting profits on criminal roads.
Establishing conditions for export of national income - without being taxed, and others.

Establishing conditions for the management of the current process for the receipt of financing from the European funds. Establishing conditions for monitoring the current process of receipt of funding of variable funds. Establishing conditions for the development of different energy sources of the country. Establishing conditions for depopulation of the country concerned.

Creation of conditions for islamization. Creating chaos conditions in the respective country.

Establishing terms of intermediate acquisition of financing from the European funds - between 30% and 40%. Establishing terms and conditions those companies to participate in infrastructure projects and projects. Establishing conditions that, when financing, the respective companies in the respective country should be obliged to buy equipment, equipments, machines, equipment, goals, installations, goals, production lines in Germany, France.

Establishing conditions of dependence of the banking system of the respective country from the respective banks of mafia. And of financial-bank resource - technological materialism. The Banking Institutions of Europe - Germany, Italy, France - USA - of the Rothschild Rockefellers Creating a Common Military Block - Creating the North Atlantic Treaty - NATO April 4, 1949 in Brussels and thus security control and dependence of all US states, the US military complex of the United States, the establishment of US bases in the countries of the Union of Germany.

3.3.1. Historical consistency and evidence of the whole process of the formation of the European Union

1. The capitulation of Germany May 7-8, 1945 in Berlin.
2. Kanzleracte
3. The Morgentaw Plan
4. The Marshall Plan
5. 5.1. The Coal and Steel Treaty.
- 5.2. NATO
- 5.3. the profit of representatives of financial banking resource technological mafia-driven materialismus - in Germany, France, Italy, Belgium, the Netherlands and other east European countries - 30% to 56% of the budget of the European union every year

4. Mafiotismus in the world, European Union and European Commission and European Institutions

Formula of the Mafiotismus for the European Union, European Commission and European institutions including the European Courts.

The most simple model of the mafiatismus that describes the factors that affect the amount, type, and etc of the mafia is the following:

MAFIOTISMUS = personal Power / on the top of Europa state institutions /EU. EC, European courts, European Parliament / state and etc./ + Influence + Connections / to personal, private companies + Interests / personal, private, corporative / + order / orders + Personal management of all state neveaus + Personal Control of all states niveausMafia structure / inside or outside / + Monopolity Riegths + laws / rules / practices / procedures + possibility of taking an alternative decision - obligation - responsibilities - morality / ethics + Personal management and personal control of distribution of public state monetary and other resource (including European funds and funds).

5. Principles of earning nations and states from representatives of financial banking resource technology mafia-driven materialismus by the actions of the international monetary and the World Bank

Creating and defending entire countries through the IMF and the Bank:

The IMF and the World Bank system

- the imposition of privatization programs aimed at the sale of individually identifiable oil and gas resource-holding companies, which are ultimately privatized by the IMF and World Bank relatives of FBIHM-Materialism.
- introduction of privatization programs, sale of state-owned and other assets to private companies, corporations, banks and banking institutions close to it
- introduction of programs in all spheres of government,
- introduction of pressure programs for governments and political parties.
- creating conditions for trade wars
- promoting programs to change laws, social security, regulations, benefits, pensions in the countries concerned
- imposing programs to change the pension system in the country concerned
- the introduction of educational change programs in the country concerned
- imposition of health change programs in the respective country - hospital, health insurance, hospital and out-of-hospital care, establishment of corrupt practices in hospitals, polyclinics, medical guilds, lack of treatment, no access to treatment, no access to medicines
- imposition of programs for changes in the banking system, privatization of bank assets, of banks, through IMF and Swatbank relatives
- the imposition of programs for changes in the financial system by generating crisis, economic, governmental ones,
- the introduction of programs to change the economy for the benefit of firms - private companies close to the IMF and the World Bank
- Establishing business creation programs for the poor
- imposition of lawlessness in the judicial system - lack of justice, legitimacy in the judicial system, introduction of programs to mafia the judicial system in the respective country
- imposition of mafia programs on state and municipal administrations in the respective country
- Implementation of Mafia programs for the executive - Council of Ministers, Ministries, in the respective countries
- imposition of mafia programs on control and inspection institutions
- Mafia laws, business support for the rich and the super-rich
- establishment of a debt system in the country concerned
- Establishment of a system and programs for the respective governments for greater poverty, by reducing rent - income from rents, capital investments, real estate, etc., through government policies, through the enforcement of laws / example of the European Commission and the European Union, through creation of corrupt practices towards state institutions - NRA, police, by creating a mafia in all state institutions, by creating a mafia in the judicial system - court, prosecutor's office,
- creating conditions and occasions for wars
- Creating a shortage and limiting conversion opportunities
- imposing programs for reducing wages and creating a minimum wage system for 99% of the population
- imposing programs to create a poverty group and a group of the over-rich through the tax system - increase taxes, by setting a minimum wage and its dependence on GDP and other indicators,

- the imposition of programs and systems at the national level to support foreign direct investment to launder money in the country concerned, by minimizing income compared to developed countries
- imposing a system for providing medium-income earners with minimal human existence without creating other opportunities for conversion
- imposition of a system of mafia for government, economic union, countries
- Creation and generation of crises - economic, financial, monetary, demographic, cultural and others.
- Creation and generation of refugee crises
- creating and generating crises in social systems
- establishment of a system for imposing corruption practices in the state, local government, laws, public procurement,

IMF and World Bank policies -

- The indebtedness of entire nations, peoples of the States, with a view to long increasing the divide of inequality, buying - privatization of state-owned enterprises, funds, resources, entire economic sectors, Inequality between countries.

Creation of crises and, at the same time, the IMF and the World Bank offering to help countries overcome these crises.

The IMF offers assistance to address these crises. The IMF is deliberately failing to deal with these crises.

The ultimate goal is to create a debt spiral of these countries to the IMF and the World Bank.

In the event of loss of interest and resources for the US and for companies close to them, the IMF and the WB make plans to overthrow governments.

Proposed IMF stabilization strategies include the following steps:

- Free currency exchange rate (introduction of special customs tariffs).
- Freezing wages - leading to widespread unemployment.
- Lack of social programs.

Seizure of gold and other reserves.

Creating a deficit in the state budget.

Difficult supply of the population with basic goods and services.

The IMF prohibits the relevant governments in their respective countries from concluding bilateral trade agreements with foreign countries which it cannot control.

The IMF takes control of all the trading and financial operations of all countries where it enters.

IMF programs to reduce government loans in the public sector and increase foreign loans.

Increase in inflation

Creating conditions for speculation and black market growth.

Creating conditions for increasing crime and inequality.

Decrease in stocks of currency

Creates conditions for control of national security and national defense.

Creates conditions for the entry of foreign capital of companies that are close to the IMF and the WB.

Creates conditions for mass impoverishment

Creating conditions for hireinflation

Reduction of staff in state-owned enterprises

Creating total poverty

Creating a scheme for linking strong economic groups with foreign capital

Objectives:

The sole purpose is the profit and enslavement of peoples, states, governments, the creation of monopolies. Participating countries - banks, financial institutions, companies - oil, resource, steel, oil, food, medicine, fuels. The goal is foreign companies entering the countries, exporting resources, goods, national wealth, without engaging in the development of the local economy, markets, consumption.

Outflow of national capital outside the country concerned

Creating speculation and crime

Depreciation of the national currency

increase in debt

accelerated inflation

reducing stability

creating chaos

creating continuous conflict

export of capital

the acquisition of the resources of the countries of a pittance is also being utilized

The main tool the IMF advises on deficit management is the currency devaluation, which in turn accelerates the debt spiral. The devaluation leads to an incredible increase in inflation, which accelerates the debt spiral. All this leads to hyperinflation. Creating conditions for destabilization of the respective country, import of corruption, provoking civil war, provoking war, creating conditions for the maturity of an economic crisis that would lead to destabilization of the political power in the country.

Finance and money determine politics, wars, peace.

Control of 99.9% of the population through governments.

Control of all finances,

Growing true government and state subjects

Increase in inflation

Creating conditions for speculation and black market growth.

Creating conditions for increasing crime and inequality.

Decrease in stocks of currency

Creates conditions for control of national security and national defense.

Creates conditions for the entry of foreign capital of companies that are close to the IMF and the WB.

Creates conditions for mass impoverishment

Creating conditions for hireinflation

Reduction of staff in state-owned enterprises

Creating total poverty

Creating a scheme for linking strong economic groups with foreign capital

Foreign capital liberalization

Destabilization of the national market

Foreign companies entering the countries,

Exports of resources, goods, national wealth

Outflow of national capital outside the country concerned

Creating speculation and crime.

Depreciation of the national currency,

Debt escalation,

Accelerated inflation,

Stability reduction,

Creating chaos,,

Continuous conflict creation,

Export of capital,

Assimilation and acquisition of resources of the States at a premium.

IMF aims for liberalization for foreign capital

The IMF aims at no stabilization of the national market

The main tool the IMF advises on deficit management is the currency devaluation, which in turn accelerates the debt spiral. The devaluation leads to an incredible increase in inflation, which accelerates the debt spiral.

All this leads to hyperinflation.

The banking reforms that the IMF aims and prepares for the ultimate purpose are to privatize banks and from there the assets, the firms - of the main industries, the foreign trade companies, the main enterprises for the production of resources, goods,

Creating conditions for destabilization of the respective country, import of corruption, provoking civil war, provoking war, creating conditions for the maturity of an economic crisis that would lead to destabilization of the political power in the country.

Robbing 99.9% of the population

Plunder of 99.9% of income, savings - through high taxes, interest rates, increased food prices, increased prices of services, increased prices of consumables, increased interest on credit cards, on fast loans,

Control of security services and compromise management.

Whole country control

Control of governments, states through debt securities.

Money control, their circulation, movement, direction, direction.

Policy control and policies implemented

Policy control

Importing and exporting corruption in a country to destabilize it creates inequality in society.

Export and import of mafia principles in one country.

Creating a debt economy, a debt spiral for 99% of the population, controlling money, controlling money transfers, making money payments, controlling credit, controlling money, controlling countries, societies, nations, governments.

Mastery of the masses, peoples, personalities through racketeering, coercion, orders, use of institutions of Personal control, with debit, credit cards, mobile phones, mobile applications - continuous control. Control of civil society through foundations - NGOs to replace public opinion, fund them to control and manage society.

Ownership of all the resources of the earth, oil, gold, silver, uranium and their income.

Disease population management.

Management of the population through environmental pollution. Technology management, when to bring one technology to a realization, why not, hold on to another, disappear. Crisis Generation - Any, economic, monetary, social, refugee, conflict, war political crises. The financial crisis occurs most rapidly, the currency crisis emerges instantly, followed by economic crises, Part of the financial crisis, and one of them is the currency crisis. A financial crisis ensues. There are always economic crises. Creating a debt spiral, the responsibilities of individual citizens, families, communities, entire countries.

Crisis generation schemes to increase inequality in a people, nation, community, unions, peoples, control and government

- Calling wars - they lead to deep inequalities. Calling for military conflicts
- Calling military intervention in a foreign country that creates chaos and inequality.
- Import and export of corruption, mafia in all institutions in one country,
- Withdrawal of money from circulation creates immediate economic crises. They, in turn, cause enormous damage to entire countries. It receives loans accordingly.
- Causing Refugee Crisis - Causes - Creates economic, social, demographic, social, political crises.
- Challenge to the Financial Crisis
- Challenging the currency crisis
- Causing economic crises
- Causing a political crisis - not always last
- Increasing the deficit - for the purpose of subordination
- World wars are becoming redundant because of the danger of nuclear exchange, so terrorism, Islamization will be used.
- Managing the population through fears that create stress. Fostering fear among the population.
- Creating an antipode - through fear, manipulation
- Creating an intrigue machine
- Creating a machine for seeming occasions - for wars, conflicts, aggressions, sabotages,
- Exciting inflation and deflation afterwards
- Creating an antipode - the ultimate goal of the Cold War battle - is generating huge profits, huge cash flows,
- No mastery of resources, control of resources, management of resources for personal purposes only.
- The machine of intrigues and compromises and the creation of false occasions.
- Generate, fund and combat terrorism.

6. GDP indicator imposed by the IMF and the World Bank - a real tool for controlling and managing entire countries and governments - economic fraud

Indicator - Gross Domestic Product

Gross Domestic Product, imposed and marketed by the IMF and the World Bank, is a method of measuring the quantity of goods and services produced in a given territory over a period of time. GDP per capita is the most commonly used indicator for comparing the well-being of different countries, and the change - in a positive or negative direction - for improving or worsening the economy. GDP can be measured in nominal and real terms, with real GDP taking into account inflation levels. GDP is most often measured by the expenditure method

$$\text{GDP} = \text{consumption of goods / services} + \text{investment} + \text{government consumption} + \text{net consumption / difference between value of imports and exports.}$$

In this section of this article, we prove indisputably that this indicator is a real fraud on the economic theory and does not reflect the real state of the economies of the countries. In addition, it does not account for the size of the "gray economy", non-market transactions, transfer pricing, exports of capital and income in a criminal way.

In this article, we prove that real consumption of goods and services is not real. Investments will not be reported really. Government consumption is not taken into account in real terms. GDP is used as a standard of living by the IMF and the World Bank. In this article, we prove that this is in fact a deceptive economic dimension.

Consumption shows the cost of consumers for end products / services. Why this indicator does not really account for. We will show an example:

Prices of finished goods - food for consumption as a single family life support in Bulgaria is 33-35% higher than the prices of the same goods offered in Germany and England. So, this cannot reflect the wealth of a nation even more so that the average salary for Bulgaria is 650 euros, for Germany 3500 euros, for England it is 2850 pounds by 2018- The "investments" indicator represents investments of the companies for infrastructure, marketing, staff training, real estate purchase, construction of green factories, as well as non-financial products.

Government purchases are the cost of spending. This does not include wages in the budgetary sphere and expenditure that does not constitute the production of goods and services. It includes government spending on goods and services, as well as defense, infrastructure, goods and services, defense, education, police, health and others. According to Keynes, this value is key to GDP's output. The "government purchases" indicator depends mainly on political factors, not economic ones. It is not reported that the population has access to a small part of the goods.

When the gray economy is 30-35%, as is the case in Bulgaria, GDP does not account for when a foreign investor is a concessionaire of gold deposits with a concession fee of only between 0.75% and 1.5%, ie. billions are exported, and they create environmental problems. The net export indicator does not respond objectively. Because an example:

Chinese companies manufacture human detoxification devices and export prices range from \$ 115 to \$ 185. The same products manufactured by German companies cost between 2800 - 3250 euros. This is true for millions of goods. And when foreign companies export manufactured goods, they sell them at cost prices, with profits made out of state. Ie the share of such goods in net exports is not comparable.

In fact, 368 investments made by foreign and Bulgarian companies were analyzed. There are indisputable patterns that prove that:

Foreign investments of foreign companies on the territory of Bulgaria are solely for the purpose of using solely and especially cheap labor, for creating company advantages over competition, for money laundering, for production of products with low cost.

The real purpose of these foreign investments is the following:

1. Production capacity building

- Buying a pitch
- Build a factory with the right infrastructure
- Equip this factory with the appropriate equipment.
- Like the land purchase investment, the construction of the plant and equipment are loans from the parent company to the subsidiary.
- Use of transfer pricing to obtain low cost and export price.
- The goal of 100 percent export of production to the parent company.
- Achieve profits controlled and managed by the parent company in the respective domestic and foreign markets of the parent company.

2. Establishment of chains from shops or logistic centers for the sale of goods and services

- purchase of land
- Build the appropriate chain
- Equipment of this chain.

- Use of the chain of import and sale of goods from foreign producers in the European Union. Since in Bulgaria there is no requirement to sell more than 50-80 percent of the goods produced in Bulgaria in these chains, through the import of products from the parent company - a huge turnover and sale of the goods at prices even higher than the prices is actually achieved in foreign markets.

Industries that use the above two schemes. In the first point, this applies to production capacities producing electrical materials, electrical cables, electrical equipment, electric generators, complete electrical equipment for cars, production of household appliances, production of household appliances, production of mattresses, production of furniture, production of wood gaps. , production of car cables, electrical equipment for cars, for car air-conditioning systems, production of automobile copents., production of machine parts, production of m some wires, production of car upholstery, production of double-glazed windows production of auto parts, headlights and more. The whole range of outsourcing services.

In the second point, this applies to grocery chains, gas station chains, a chain of real estate brokerages, chains of electrical machinery wholesale stores, real estate equipment, building materials. In reality, however, both have the following actions:

Parent companies borrow money from daughter companies to buy property, to build the appropriate buildings, to equip the respective buildings, to buy loans for the relevant goods and services that will be offered for sale in the respective chains.

The conclusion is this: In reality, these investments cannot be considered investments, as all loans are repaid at appropriate interest rates, which are above market rates for the parent companies. In reality, cheap labor is used as a result. The accounting of these "investments" as part of the Gross Domestic Product of a country - in this case Bulgaria - is economically incorrect. In reality, these are money-laundering actions from the parent company to the daughter company regarding the entire business. Globalization and liberalization really help this money laundering.

7. Types of governance management and increase inequalities in IMF and World Bank programs provided and imposed on countries and governments

Creating products for the poor - creating more poverty - fast credits, fast credits without security, contracts without working time, without working time. This will all cause stress, fear and insecurity in the global poor. The vent will be gambling, alcohol, drugs - more profits, more addiction. These industries will make huge profits. Businesses with second-hand and second-hand stores will be developed. The state, on the other hand, maintains this laughter by raising taxes, increasing uncertainty in justice, in obtaining justice, Creation of laws by which the governments and their administration determine their own tax level, amount of taxes - profit tax, real estate tax, municipal waste tax, elimination of the opportunity to appeal the enormously huge tax assessments - illegally determined and way from the governing. The Mafia will rule the administrative courts - there will be no way to get justice. The aim will be to reduce the middle class, to weaken it, to destroy it, to bleed it, not to have the strength to develop, to withstand crises and to create competitive products, services, The real investment opportunities for the middle class will disappear and the purchasing power will be reduced. As a result, the middle class will move to the global poor. Both the global poor and the middle class will enter the spiral of poverty - the centrifuge - the whirlwind.

In fact, the middle class will evaporate. The cash system will be covered by fast loans with huge interest rates - at exponentially high interest rates. Only two types of business are developing - business for the huge rich and business for the global poor. Only for these two layers. Global inequality as an opportunity for business to deepen

and grow. Money from the division of society, strengthening this inequality, creating unique opportunities for profit. Global strategies for developing, increasing, deepening inequality. Displacement of money, goods, services, prices in the movement of the global economy. Plutonomics - the rich get richer, it's about 0.1% of the rich. Oil companies, steel, construction, hedge funds, food industry, chemical multi-companies, supermarkets, aircraft builders, pharmaceutical companies, car manufacturers, internet providers. Greater polarization and increased inequality. Inequality across countries is increasing. Inequality in each country will increase enormously. Above are the super-rich - who buy a Bentley car, and Lear planes. Global Poverty Creating Poverty Products and Services - Fast Credit

- Fixed-term contracts
- Quick loans
- Huge interest rate loans
- Following in response - stress, tension - leading to an increase in the alcohol, drug, gambling business - hence the disappearance of individuals, peoples, communities
- Cheap goods stores
- As a result, the middle class will be squeezed, which at some point will be forced to disappear.
- The middle class will move to the poor class
- Vacations, a new car and more - and all this on credit.
- Both sides - expensive cars and services, real estate,

Precariat - the poor 99, 9% of the population - money drives passion, nerves, behavior.

Focusing the business of these mega-companies in both layers: the super-rich and the super-poor. Generate crises that will cause the middle class to become more and more impoverished, with the poor class multiplying. Institutions that create the division of strata, manage this division both for the whole country and within the countries themselves, increase this division, strengthen the division -. IMF, World Bank.

The process is the transfer of wealth from the poorest to the richest. Fundamental rights - violated rights, therapies and services, justice, the mafia - exacerbates inequalities through corruption, the mafia reinforces inequalities through a mafia-like behavior, governance. Increasing cost bubble. They work with a wage from poverty - insecurity. The poor die 10 years before the rich. Social cleansing. Social purification and through Islamization. Working 12 hour shifts hired on a part-time basis. Their life goes on a journey - at least 90 minutes away from their home. Dividing cities, districts. Creating two types of cities and neighborhoods. Both layers are actually avoided, do not cooperate, do not communicate, do not communicate with each other.

There is a division in the cultural, emotional, communication sphere, not only in the social sphere. Destruction of social contacts, social networks, the poor reduce food and heating in order to survive so that they can pay their rent. Now, 41% of German income goes to renting a home, while 3-4 years ago this expense was 25% of German income. There is a continuous increase in costs. Debt inequality is increasing. Debt as a means of increasing division.

8. Creation of the debt spiral and its management and control implemented by the international currency fund and the World Bank for people's, nations, countries

Debt can be managed, controlled by division. Reducing mortgage funds, support systems for small and medium-sized businesses, supporting their businesses. Quantitative eases go to the businesses of the rich. Public procurement is managed only and solely by the firms of the rich, the poor and the medium-sized companies are driven by tenders, tenders, and public procurement. Public contracts are awarded to specific large companies, so that only they meet the conditions and requirements for participation in the respective auction, competition or

public procurement. Banks only finance and support the businesses of the rich. European funding goes to the rich companies. Fast Credit Companies. The debt industry is part of the means of creating, managing, controlling the division of society. The financial industry is a vehicle for this debt industry. The financial industry is providing fast loans with high and huge interest rates. The emergence of fast loan companies, where money laundering, uncontrolled money laundering is just the rich. The rich invest in products, industries, business services for the poor. They practically deepen and accelerate division and inequality. Extended loans for the purchase of cars, furniture, vacations, real estate, Bridge Loans Fast loans to cover heating and food bills. Debt - its increase practically accelerates inequality and division in society. 93% of Bulgarian property is privately owned. By dividing and increasing inequality - practically poverty alleviates this property as people have to sell their property in order to survive in order to make ends meet, Continuous tax increase, food prices, services, utilities. Debt trading, increasing debt, financial institutions trading our debt.

Quantitative eases in the US 2008 actually go to financial institutions instead of going to citizens. Instead, they should be spent on services, appliances, vacations, refrigerators, TVs, cars. Instead, these quantitative easements have exacerbated and increased inequality and division. The plan was more debt, Throwing money in a crisis actually creates more inequality and division of society. Calculating Poverty - Debt Debt - Increasing Debt - All measures taken by governments to ensure that people have more debt. Currently, household debt in the UK is around £ 395 billion. Debt books - a way and tool for managing entire countries.

The International Monetary Fund, since 1945, imposes the wrong economic recipe schemes and decisions on countries, degrading their economic and production capacity. Poland and China do not accept IMF policy. In the wake of the collapse of the Soviet Union, Russia falls into the deadly embrace of the IMF and the World Bank - through violent corrupt privatization, entire factories of hundreds are privatized. The decisions of the IMF and the World Bank have led to the bankruptcy of entire industrial sectors in certain countries.

9. Mutual countries through the International Monetary Fund and the World Bank – examples

The policies of the IMF and the World Bank - the indebtedness of entire nations, peoples of countries, with a view to long increasing the divide of inequality, buying - privatization of state-owned enterprises, funds, resources, entire economic sectors, Inequality between countries. Creation of crises and, at the same time, the IMF and the World Bank offering to help countries overcome these crises. Creating crises in Latin America. The IMF offers assistance to address these crises. The IMF is failing to deal with these crises. This is deliberately done. The ultimate goal is to create a debt spiral of these countries to the IMF and the World Bank. The result of these impacts - deepening disparities, accelerating the lagging behind of these countries from other countries - increasing inequalities between countries. When do these crises occur in Latin America, for example. When the interests of the United States are threatened in those regions that are very rich in natural resources.

Example The US is losing its lead revenue in Bolivia after nationalization of lead mines. The result - the United States is looking for an option to overthrow the government. 1952 General Barrientos wins the election. Steps - The military dictatorship opens Bolivia's doors to foreign capital wide open. The IMF's stabilization strategies include the following steps:

Free currency exchange rate (introduction of special customs tariffs. Freezing wages - leading to widespread unemployment. Lack of social programs. Bolivia has been brought down.

The same thing happened in 1960 in Uruguay. There is an increasing deficit in the state budget. The national and 88 foreign banks, created in 1949 - 1959, contribute to the instability of Uruguay. 1954-8g. Uruguay exports gold

to the United States. For \$ 16.5 million. The country is plagued by misery. Difficult supply of the population with basic goods and services.

The IMF also prohibits Uruguay from entering into bilateral trade treaties with foreign countries it cannot control. However, such bilateral treaties lead to increased trade and stabilization of economies., Exports of goods, resources. The IMF takes control of all Uruguay's trade and financial operations. The IMF also puts Montevideo's National Bank under control.

1968 The IMF orders the Uruguayan National Bank to reduce its public sector loans and increase foreign loans. which makes them more dependent on foreign loans. As a result, inflation jumped tenfold between 1966 and 1972. \$ 350 billion is being spent outside the country. Uruguay's foreign debt increased by 5.3 billion pesos in 1967. up to 14.7 billion pesos in 1970. Speculation and the black market are growing. Crime and inequality are increasing.

1956 causes the crisis in Argentina. The agreement with the IRF reduces the stock of foreign currency, foreign trade, prices increase, the balance of payments is undermined, the state is obliged to submit complete information to the IRF which information is really relevant for national security and national defense. The state allows foreign capital to flow. The benefits received from the fund are much less than promised. For the period 1958 to 1970, the Argentine peso was 13 devalued. The standard of living has fallen sharply, the population is massively impoverished, and the state regulation is strengthening.

In the late 1950s, Brazil experienced hyperinflation, based on low coffee buying prices. , wages fall 4 times, In fact, national resources are acquired by foreign companies. Brazil seeks the assistance of IRF. The measures are to reduce the wage quotas for employees in the budgetary sector from 37% to 27%. , 300,000 personnel from state-owned enterprises have been laid off. this is 20%. The difference between rich and poor is deepening. The total poverty of the population is increasing.

1968 Peru co-ordinates with the IMF the creation of 450 foreign companies. These companies are from Japan, Germany, the United States Debts to foreign countries increase enormously. the country is insolvent. In 1970, representatives of foreign companies who violated the laws of the state were sued in Peru. Partial nationalization is taking place. In 1972. the state investments are 39%, in 1973 - 42%, in 1974 - 43%. There is a strong link between strong economic groups and foreign capital, leading to economic de-stabilization. This applies to Brazil, Argentina, Chile.

The IMF aims for liberalization for foreign capital, no stabilization on the national market. The goal is foreign companies entering the countries, exporting resources, goods, national wealth, without engaging in the development of the local economy, markets, consumption. Inequality grows dramatically, discontent grows in strikes and riots, poverty increases. Crime is increasing, In Jamaica, after the nationalization of the bauxite industry, which is a major item of income in the national budget, economic growth began to decline, sovereign debt increased from 1973 to 1980 from \$ 501 million to \$ 1.595 billion in 1992. and in 1992. it's already \$ 2 billion. Jamaica is seeking the assistance of the IMF, which promises \$ 240 million over a 3-year period, and returns the proceeds to foreign investors and related strata instead of returning to productions. More than \$ 300 million is actually flowing. As a result, consumer prices are rising, poverty is rising, oil, electricity and water prices are rising. , unemployment increases drastically, IMF is not really interested in any social activities, New IMF contract - results in freezing of wages, favorable conditions for foreign capital inflow are created, currency is restricted, 1982. Jamaica's unemployment reaches 26%. The militarization of the country with the help of the USA began in 1982. Jamaica becomes the first US aid to the Grenada aggression.

Regulating the economies of Latin American countries through IMF accelerates and increases their independence. In the IRF system, it creates speculation and crime. Depreciation of the national currency, rising debt, accelerated inflation, reducing stability, creating chaos, constantly creating conflicts, exporting capital, absorbing and acquiring the resources of the countries of nothing, for 1988 only exported capital \$ 420 billion from Latin America.

The IMF does not change its strategy and approach even after an increase in liabilities, which in reality leads to an inability to repay its financial obligations, reduces investment, which in turn increases volatility and accelerates the debt spiral. The main tool the IMF advises on deficit management is the currency devaluation, which in turn accelerates the debt spiral. This is proven for Brazil in 1986, in Mexico for 1986, Argentina - 1986-1988. It also leads to a decrease in production. For Chile it is 15% for the period 1974-1975, for Venezuela it is 8% for 1989, in Peru - it is 6% for 1990. The devaluation leads to an incredible increase in inflation, which accelerates the debt spiral. All this leads to hyperinflation.

For Argentina, inflation has reached 4000% in the 1980s. 40% of the population is impoverished sharply and quickly. The other instrument that the IMF is destroying countries is privatization. The purpose of the IRF and the representatives of the FBIHM - Materialism is to buy the main sectoral businesses at a price from nearby living rooms. This is all included in the so-called shock therapy. The banking reforms that the IMF aims and prepares for the ultimate purpose are to privatize banks and from there the assets, the firms - of the main industries, the foreign trade companies, the main enterprises for the production of resources, goods.

10. Middle class destruction as a form and instrument to increase inequality in IMF and World Bank programs

In the 50-60s, the middle class flourished - the middle class increased consumption and investment in mass consumption. In the last 20 years, the middle class has shrunk - Between 1945 and 1978, the wealth of society was more evenly distributed. The middle class had the ability and means to own real estate. Millions of people are acquiring real estate. Most were able to buy their own home for the first time. It's back in Bulgaria. After 1996, the trend reverses. There is wage stagnation, and an increase in living expenses and expenses. Currently, 41% of Germans' median income goes to renting used housing. 5 years ago, these expenses were 25% of the average income. Real estate prices are rising faster than incomes. The wealth of the richest is growing much faster than the average wealth and much faster than the size of the economy. Rent is the norm for housing A family who pays a single-life rental is poorer by £ 561,000 than a family who buys.

In fact, rents are growing faster than the increase in income. Costs grow faster than incomes. Separately, the rent grows faster than the monthly mortgage payment for the home purchased. Practically, wealth begins to melt and decline faster than income increases. 1968 The French almost overthrow President de Gaulle. Banks create inequality in consumer mortgages. Norms and morality are falling inequality is increasing. Opportunity inequality - inequality of opportunity for expression - talent and more. There is no equality of opportunity. Altar Laffer shows a leak of wealth. The economy of seepage is as old as civilization. Previously it was called Divine Right. Reagan - Thatcherism - make rich people richer, everyone will be richer. Investments reduce economic growth, it doesn't happen that if you give more money to the rich, it will create jobs.

11. Increasing inequality by Maphotizing the judicial system, the government in the IMF and the WB

Through mafia and corruption practices among judges, prosecutors, investigators, civil servants, ministries, municipal offices, mayoralities, citizens are guaranteed:

- Loss of rights
- Loss of justice
- Loss of legality.

Mafia as a form of government, creation, control of inequalities in one country, different countries.

Formula of the Mafiotismus

The most simple model of the mafiotismus that describes the factors that affect the amount, type, and etc of the mafia is the following:

MAFIOTISMUS = Personal Power / on the top of state institutions / state and etc./ + Influence + Connections / to personal, private companies + Interests / personal, private, corporative / + order / orders + Personal management of all state niveaus + Personal Control of all states niveaus Mafia structure / inside or outside / + Monopoly Righths + laws / rules / practices / procedures + possibility of taking an alternative decision - obligation - responsibilities - morality / ethics + Personal management and personal control of distribution of public state monetary and other resource (including European funds and funds).

This mafiotismus ia a base of the “Financially banking resource-based technological mafia-driven Materialism” developed by Lord Prof. Momtchil Dobrev – Halachev. This whole process is facilitated and accelerated by the environment for the emergence of any crises - neoliberalism and globalization. Inequality between citizens and strata in society. Through financing - state and other, through laws, through the import of corruption and / corruption methods / mafia. Through the debt curve of a family, a nation can calculate inequality, the division of a nation. The debt curve shows the value of poverty, the development of poverty. Poverty assessment is by analyzing debt, the debt spiral.

12. Minimum wage - An Instrument for Increasing Inequality, the Divide of the Society - index used by the IMF and the World Bank - an instrument of fraud by governments that define it as a percentage of Gross Domestic Product - total fraud

Very often, the minimum wage of governments and leaders is determined by GDP. This is a scam. The fraud of the value of wage pensions and of Gross Domestic Product, respectively.

In India, Portugal, Italy, pensions are 90% of salary, in Turkey - 100 %% of salary, in Croatia - 129 %% of salary. In Bulgaria - the minimum pension is 40% of the minimum wage, the average pension is 33% of the average wage. At the same time since 2009. Bulgaria sets a corporate tax of 10% for businesses and citizens. This helps to divide the population. The average for the European Union is 71% of salary.

Determining the Minimum Wage as a Dependency on Gross Domestic Product - Another Fraud.

GDP min salary average salary min pension

--- Romania

Macedonia	5060 USD 270E 532E 206 E
Albania			
Serbia	5294 USD	260E	520E 220E
Greece.			
Croatia			
Bulgaria	7091 USD	230E	484E 83E

Fraud to establish minimum wages. Worldwide minimum wage setting systems:

1. Nordic model - this model is applied in Denmark, Finland, Norway, Sweden and Iceland, as well as Austria and Switzerland.

This model lacks a national and universal wage that applies to workers, regardless of their industry or geographical location. The level of minimum wage is regulated in the dialogue between employers and workers' organizations in individual sectors. The minimum wage is entered in the collective agreement, which refers to a specific industry, which applies to union members and other workers. In Sweden, the minimum wage is determined not only by industry but also by age, experience and education. This payment really corresponds to the opportunity in the individual branches and to the qualities of the workers. Collective bargaining limits the ability to negotiate directly between the employer and the employee. There is strong social dialogue and broad union membership with strong pro-business legislation.

2. Japanese Model

Pay depends on the region / prefecture / industry. The amounts of the different minimum rates depend on the standard of living and the cost of living in the individual prefectures, as well as the employability of the employers. Minimum regional levels are set by the central government, and local authorities decide what are the industry minimums in their prefectures, in the framework of a dialogue between employees and employers. This model allows maximum consideration of the differences between regional economies and those with industries. It all depends on how the employers 'and workers' organizations will agree.

3. Model of Ireland

Here the payment is hourly. These minimum hourly rates depend on age, experience and status / permanent, temporary employment, training, work experience,. Thus, lower rates apply to young people. The same goes for training or internships. There is no dependency on reporting by region or industry. Such a system is also applicable in New Zealand.

4. Models based on macroeconomic formulas ie. depend on the dynamics of macroeconomic indicators.

13. Money Laundering, Profit, Money Making, and State Profit Schemes through So-called Foreign Investment supported in the programs of the IMF and World Bank

Inequality between the income of the workers on both sides - the investor's country and the country where the investment is made.

1. Green investment means the following

The Western company registers a company in Bulgaria under Bulgarian law. The same company under the laws of the state and as an investor or receive with preferences for the purchase of land, construction of the state infrastructure, water supply and sewerage, communications, electricity supply and supply of electricity, construction of the state of the respective electricity network for high voltages, communications to transport corridors and more.

The parent company abroad registers credit lines for the construction of the respective buildings, equipment, import of equipment and purchase of equipment. All this - equipment that is obvious company development is accounted for in greater amounts, the companies that build the buildings and premises are carried out by close to the parent company, which account for construction, design and others at higher prices. Some of these larger sums go back to the parent company.

Realistically for credit lines of 100 units, the real value of these investments is about 30 - 35 units. The rest are amounts that are laundered throughout this process. In addition, the daughter company owes it to the parent company on the basis of credit lines and high interest rates. Even after production is organized, if the cost of a product is, for example, 100 units, then the finished product is exported to a parent company at a price of 100,001 units.

Le taxes are actually paid for 0.001 units. The real profit is made out. Production is fully exported 100 percent. Cost is low here - wages are low and low. Here, too, wages are between 20 and 30-35% of the real wages in the Western countries. The first option - even the company - the mother receives a land grant. The second option - donation - lands.

2. In construction - the first scheme

A company is registered. The company receives loans from foreign companies. the money of these companies is not checked for origin of money laundering and others. Credit lines are registered with the relevant government institutions in Bulgaria. Construction is under construction which costs 35% of 100 units in real terms. Here, too, wages are between 20 and 30-35% of the real wages in the Western countries.

3. In construction - the second scheme

Scheme - A company buys a property in the center of Sofia. Receives a loan from a bank with foreign capital. Real Credit - The money is given by companies close to the owners of the bank, which are foreign companies. Money is actually laundered through the bank. All income goes back to the creditors through the bank. Here, too, wages are between 20 and 30-35% of the real wages in the Western countries.

4. In construction - the third scheme

Construction of company stores. The land and the stores and chains are owned by the parent company of the parent company, which have received 100 units of credit. Here, too, wages are between 20 and 30-35% of the real wages in the Western countries.

5. Manufacturing companies. The parent company registers a company for the purchase of the respective real estate, construction of the respective construction sites, equips the equipment of the parent company. The cash for all these expenses is given by the parent company as credit lines - the loans to the firm by the daughter. Interest rates are freely negotiated. Typically, these interest rates are higher than market rates. Borrowings can also be provided by a bank in the territory of the country concerned, as guaranteed by the parent company. In reality, the entire investment returns repeatedly to the parent company of the subsidiary. The products or services produced are actually exported to the parent company at prices close to the cost of the products. Le no profit is made in the country where the daughter company is registered. The profit is made by the parent company or its branches abroad. Here, too, wages are between 20 and 30-35% of the real wages in the Western countries.

6. Banking services - financial services.

7. Property business

8. Outsourcing services.

9. Company producing petroleum products.

10. Expensing the income of a country as a method of division, increasing inequality in the considered country in relation to the western countries.

10.1. From Retail chains.

90 - 98% of the products sold are imported from abroad - given on credit with appropriate interest and penalties for delay, for the corresponding term. Prices are made - higher prices are given on consignment. Debt is immediate. The money from the companies' turnover is deposited on a vault in the evening every night in a vault of a banking institution - mostly foreign. The next morning, the next day, the money is posted to a correspondent bank account with a bank, which is a correspondent bank account to a foreign bank abroad. Realistically, in this correspondent bank account, the party is dumping money into our accounts by our parent company abroad. So no taxes are paid in the state in this case Bulgaria. Turnover per month of drainage of income from Bulgaria is on average between EUR 5-7 billion, non-taxable. This is evidenced by the profits that register chains from grocery stores, consumer goods.

10.2. For services or mobile products or services.

The actual payment of these services, if the aim is to use a 10% profit tax in Bulgaria, can be made in the country itself. However, the real situation is this: the money paid for online services is transferred to bank accounts in branches of banks that are not controlled by the Central Bank as they are branches.

10.3. For banking services. Money laundering, trading, This is done mainly through branches of banks that are not actually controlled by the central bank and are not subject to banking supervision. These branches are by all legal provisions for branches of banks whose headquarters are in another country of a European country. These banks are controlled through banking supervision in the countries where they are registered, but not in the country where they have only branches. The payments in these branches are made mainly by foreign companies on bank accounts, which are correspondent bank accounts of the parent banks or banks abroad, and with the very authentication of these bank accounts, the money is already in the corresponding correspondent bank accounts abroad. No taxes are actually paid on this money.

All these schemes are evidenced by the analysis of more than 500 manufacturing, commercial, companies, companies from the product sales chains, with a real turnover of EUR 400 - 800 million, making a profit of EUR 1-2 million, which does not really correspond on.

This is a conclusion - Such foreign investment should not be reported in the Gross Domestic Product indicator because it produces misleading results that do not reflect reality. In reality, such foreign investment should be accounted for only in terms of the employed workforce and the corresponding volume of remuneration. This alone must be taken into account in the Gross Domestic Product of the country concerned.

14. Neoliberalism and globalization as a medium for increasing poverty inequality, of division in IMF and WB programs

Neoliberalism around the world leads to globalization of the global economy There is a cyclical nature of production and crises persist. Crises are becoming more common. Crises are increasingly difficult to overcome. Progressive technologies are evolving and there is a strategic superiority of certain countries over the rest of the world. Globalization has led to the full exploitation of small nations by large nations. Neo-liberalism and globalization do not bring peoples closer, but they do move them far away, and one countries are actually enslaved to one another. They bring countries close to development, which makes the crisis immediately affect all other countries in this industrial and other development. Smaller countries are dragged down by lag and to a lesser extent. Countries in the world are not on a par with industrial and spiritual and cultural development. In neoliberalism, the global and internal markets are a major driver of economic development. Different countries have different levels of economic development. the corresponding varying degrees of competitiveness. The

economies of developed countries produce cheaper, produce more and more qualitatively, thereby imposing their output and thus conquering the markets of smaller, less developed countries. It is a process of doomed poverty. Neoliberalism elevates naturally using the political system and political parties to impose a financial oligarchy. The financial oligarchy governs governments and states respectively. In turn, the intersection of financial interests and politics gives birth not only to the financial oligarchy but also to corruption and the mafia in the state at all levels. The financial oligarchy, large corporations also hold elite government in the state. In neoliberalism, there really cannot be a civil society and civic control to control the government. Governments actually create laws that stretch corporate interests, support their activities, enforce and legitimize corrupt practices, enforce laws that exclude real civil society, enforce laws that legitimize mafia in governments, and the financial mafia. In reality, governments create and enact laws that legitimize theft, corruption, mafia, and work in the country. The media has been conquered by certain corporations that govern governments and the state respectively. The media really cannot perform its function.

Actually, the manipulation in favor of the financial and oligarchic mafia is carried out by the media, which does not allow other thinking, opinion, impose corruption and the mafia as a way of life, of governance, of the organization of society. The media is highly dependent on the oligarchs and the oligarchic mafia. The oligarchic mafia rules governments, and thus entire countries. This creates division and increase inequalities. Globalization and neoliberalism really manage inequality.

15. Conclusions

This article proves the real truth about the programs, the IMF's and the World Bank's efforts to enslave countries, nations, peoples with the ultimate goal of securing huge profits for the representatives of the Financial Banking Technology Mafia Materialism.
