Abstract

In 2010, Lord Prof PhD Momtchil Dobrev-Halachev developed “Financially banking resource-based technological mafia-driven materialism” as a principle based materialism since more than 17 centuries. In 2008, “The theory of generating crises”, 2010 “Theory and praxice of the Mafiotismus” and 2001 “The Mafia Theory”. Based on these theories, this paper draws conclusions from an emergence analysis, the causes of the Corona virus epidemic, and the effects, objectives, possible outcomes, and effects of the pandemic on different economies, societies such as China, the United States, Europe.

Keywords: *pandemic, Corona virus, economy, politics*

1. Introduction

In the year 2010, Momtchil Dobrev developed the "Theory of Mafiotismus" as a new state level based on the private and personal interests of prime ministers, ministers, government. Based on this, "Theory of Mafiotismus" Lord Prof. Momtchil Dobrev developed in 2010 the “Financially banking resource-based technological mafia-driven materialism” as a principle based materialism since more than the 17th century.

In the year 2001, Momtchil DObrev developed the theory of the mafia and the theory of corruption. All the both theories have been developed by analyzing the mafia and corruption all over the world.

In the year 2008 Momtchil Dobrev developed the "Theory of generating crises". The theory of generating crises has been developed by analyzing all the relationships between countries, and lysing the causes and consequences of crises. The theory examines all possible options for generating crises.

In this paper, a full legal, economic analysis of the Corona pandemic virus and its impact on different countries, economies, societies is made, described the activities of the representative "Financial Banking Resources Technological Mafia-Driven Materialism" in this pandemic.

1.1 Introduce the Problem

In order to properly understand the pandemic with the Corona virus, a complete and comprehensive study, a situation analysis, an analysis of the economies and the impact of the pandemic on them, an analysis of the different types of societies and their impact on the pandemic on societies, social systems must be carried out, on health systems. An analysis of the pandemic, its occurrence, occurrences, preliminary actions and various programs must be made.

An analysis of the goals of this pandemic must be made, considering all the complex factors behind its development.

Disclosure of the real causes, aims at finding out about the pandemic of the Corona virus, the causes and consequences for the economies and societies of this pandemic.

The developed by Lord Prof. Dr. Momchil Dobrev Financially banking resource-based technological mafia-driven materialism cover the real process in all countries, in nations, in states, all over the world and how the representatives of this materialism actually act only for the sake of profit for them, and losses to third parties and companies, nations, nations. The Financially Banking Resource-Based Technology Mafia-Driven Materialism Developed by Lord Prof. Dr. Momchil Dobrev covers the real sources and power and people who govern the politics, the nations, the states all over the world on the example of the trade war against China from USA.

2. Research Methods

Research methods of occurrence of Financially banking resource-based technological mafia-driven materialism and the MAFIOTISMUS, its logic of work, existence, management and its execution by activities by their representatives.

4. Begin the Beginning

Worldwide open government plans have been around for a long time.

Preparing for a new world order, the goal of globalization is collapsing, a post-global world is being created.

Replacing open society with closed society.

The sovereignty of individual countries comes to the fore.

Rescuing and securing people in a country comes to the fore.

Secrecy, changed production, changed finances, a closed society must be independent and sufficient.

Introducing an autarchy - self-sufficiency, securing society, resources and the economy and politics. Autism

Provision, One Vertical System, Currency Sovereignty, Securing Industry.

Creating the Situation of Society, Businesses, Economics, Dead Dead Legislation for Society.

Strategy and creation of system for purchase of impaired assets, collapse of the value of the assets.

Here we apply the new world system according to Rockefeller March 20, 1969.

Planned Parenthood

Population Reduction, Childbirth Permit, New Guidelines for the Meaning of Sex, Sex Without Reproduction, Opportunity for Universal Protection, Sexual Education among Young People as a World Government Tool, Supporting Government Abortions for Population Reduction, homosexuality support, sexless reproduction technology, family destruction, euthanasia and the pill, organizing access to paid healthcare for getting rid of the aging is, strict control of access to medical services, elimination of private doctors, difficulties in diagnosing new incurable diseases, complication of oncology treatment in order to reduce the population, launching a fatal attack on elimination of people, early school education to accelerate puberty and evolution, merging all religions, eliminating old religions, changing the bible, through keyword revision, school education as a tool for indoctrination, extending school hours without children auditing something, controlling access to information, schools as community centers, seizing certain books from libraries, legal changes that unleash social and moral chaos, promoting drug consumption to create an atmosphere of urban jungle, promoting consumption of urban alcohol, restriction on leisure travel, the need for more prisons, the use of

hospitals as a place of isolation, the creation of psychological and physical insecurity, the use of crime to manage and society, limiting American industrial domination, displacement of peoples and economies, rooting out social roots, ending the social transformation debate, sex and violence in entertainment, implanting ID cards / microchips / food control, weather control, getting to know people's behavior in order to inspire what is required, falsifying scientific discoveries, using terrorism as a basis for control.

More on September 23, 1993. David Rockefeller states:

"The current window of opportunity, during which a peaceful and interdependent world order can be built - will not be open for too long. We are on the verge of global transformation. All we need now is a major crisis and the nations will accept the New World Order."

4.1. Background of the Pandemia - the Facts

4.1.1 The Reason

May 2010 Rockefeller Foundation–

Scenarios for the Future of Technology and International Development Pandemic Panic. The event is organized by the Rockefeller Foundation and the Global Business Network.

Purpose:

- Reduce birth rates
- Population reduction
- De-industrialization

Rockefeller founded 1968. Roman Club.

Peter Schwartz is the founder of the Global Business Network and works with the Pentagon, preparing a 2004 Climate Change Report.

The first variant of "Lock" 2012 is a pandemic as swine flu is now spread by wild geese.

Pandemic Reduction.

4.1.2. Izvestiya newspaper, 12.12.1981

Quoted with evidence of an epidemic that left 89 people dead. The disease began in the area of Torrehom de Ardost in Ispaya, next to a large US military base that housed biological weapons. As early as 1979, a US Air Force sergeant died at that base. The symptoms are the same as the Corona virus, the source of the virus from this base. 1981 A book that triggers a coronavirus epidemic in 2020 is published. The book is authored by Dean Koontz - The Eues Darknes.

4.1.3. Nature magazine on November 12, 2015 reports that US biologists have created a coronavirus since 2015. bind the crystalline protein SHC010 to the SARS virus, taken from the bats' lungs and bound, to produce a mutant that can rapidly develop in human organisms, provided that there has been a moratorium on virus studies. The US introduced a moratorium on the financing and testing of influenza viruses, such as SARS MERS in 2014.

4.1.4. On October 18, 2019, the Bill and Melinda Gates Foundation, Johns Hopkins University and the New York Economic Economic Forum are organizing a pandemic event in New York. It simulates a situation in which 65 million people die within a period of 18 months. The Global Research Research Center said on March 19, 2020: The US is the only possible source of coronavirus.

5. Facts, Comparative Data, Beginning

From October 18 to 27, 2019, the World War Games are held in Wuhan. WHO estimates that 2/3 of the population will be infected. Chancellor Merkel says 80% of the German population will be infected. There will be no going back.

Realistically, societies must forget about democratic rights. Supervision of people and actual realization of the operation are actually realized "CONCLUSION". The following rights and freedoms are violated in this operation:

- Freedom of movement
- Freedom of speech
- Freedom of assembly
- Freedom of Confession
- Freedom to do business
- Right of access to medical services and treatment

EUROPE closes borders. Economies close factories.

In case of violation of rights, the adoption of a law for the punishment of persons who violated the respective measures is also used. As fines go within the normal range - for example, in Bulgaria for exiting the property people are fined BGN 5,000 with an average pension of BGN 280. In fact, the imposition of punitive measures guarantees fear everywhere.

5.1. The actual deaths in the relevant pandemics are as follows:

- Malaria - 750,000 deaths a year worldwide
- Hepatitis 1- died about 1 million worldwide per year
- Tuberculosis - 1.1 million deaths a year in the world
- Various infectious diseases - 3.2 million worldwide per year.

5.2. Real control over human societies, redistribution of property, the state destroys life, its own economies. The US Federal Reserve, on the other hand, is ready to fund \$ 2.2 trillion, printed money that will reach \$ 3 trillion in a two-month period to deal with the pandemic, and which will be a clear use to buy impaired assets.

5.3. The facts about the disease - the virus lingers:

- 3 hours in the air
- 3 days on plastic
- 24 hours
- 4 hours on honey
- 3 days on steel

Symptoms: breathing problems, shortness of breath, disturbed breathing, shortness of breath, dry cough - becomes severe, gradual tickling of temperature. This is different from the flu.

The new Chinese killer virus has actually mutated the SARS virus. The coronavirus is aimed at the human respiratory system and actually strikes where there is a reduced human immune system, even if he is suffering from another disease - cardiovascular disease, and other diseases. Because the virus only attacks the immune system and lungs, immune protection remains the only barrier to the virus.

Wuhan's choice. Wuhan is right in the center of China and tens of thousands fly from Wuhan to other countries such as Los Angeles, San Francisco, New York and dozens of other countries, as well as Singapore, Japan, Hong Kong.

The first epidemic of SARS 13 years ago was considered a biological weapon of the United States, and was derived from a mix of measles and mumps, according to Russian scientists. This combination cannot in any way be naturally formed. In reality, this virus is artificially synthesized and distributed by people and countries.

As early as 2003, American scientists collected thousands of blood and DNA samples and samples from mainland Chinese in the implementation of many collaborative research projects conducted in China. These samples were shipped to the United States after sampling. These samples were collected from 22 provinces, and all of these provinces were actually affected by SARS. In addition to the United States and Japan, in their factories in Guangdong, they were obliged to donate blood and DNA samples to the factories directly and not to the respective local hospitals.

In reality, the current coronavirus is a second attempt, using a new version. Wuhan's choice is not accidental, since Wuhan is in the center of China. And the time was not chosen by chance. This is the time of the Chinese New Year. Internationally, the peak of the trade war between the United States and China was also present; on the other hand, China was building Eurasia with Russia internationally.

On the other hand, one of the Chinese laboratories operating in the same area is located in Wuhan. The Wuhan P4 Lab has been created for 14 years and has been assisted by French specialists. The laboratory complies with the most stringent safety standards and standards for bacteriological sites. The National Laboratory is the first in the country to establish and meet the highest standards of biosafety - 4 BSL-4, which means that the laboratory is specialized in dealing with the most dangerous viruses and pathogens. This laboratory has examined coronaviruses in the recent past such as SRAS, H5N1 and other encephalitis.

Wuhan was used to say that "the virus" must have been "leaked", which could be replicated by the media. In reality, the Chinese had to start celebrating their New Year on January 25, 2020. The first cases were registered in December 2019. In addition, around the United States, China has built dozens of laboratories that are developing new deadly strains.

On the other hand, there is also evidence and evidence of activity at the Canadian National Microbiology Laboratory, NML, which offers comprehensive coronavirus testing services, SARS coronavirus genome isolation and NL63 coronavirus identification in 2004. These powerful deadly viruses are a potential bio-weapon. This is the lab that is one of the few in North America that is equipped to deal with the world's deadliest viruses such as Ebola, coronavirus, SARS and others. In addition, Chinese specialists have been expelled from the laboratory to work in the vaccine and antiviral therapy development department.

5.4. AMERICA - biological laboratories and centers - the facts

On the other hand, there are the following facts and evidence. The availability of US biological laboratories scattered around the world and concentrated to the borders of Russia. A well-known such laboratory is in Dugway, in the desert, and in Utah is a top-secret military facility where chemical, biological and radiological weapons are tested and developed. The site was created in 1942. after entering the United States enters the Second World War.

At this base, incendiary bombs and chemical weapons were created and the most famous "Orange agent", which was scattered over Vietnam in the 77 million liter Vietnam War. The victims of these chemicals are more than 3.5 million people, and even then until now, children with locomotor problems have been born. Today, US laboratories are around 200 worldwide, most of which are located around the borders of Russia, such as ten such centers in Azerbaijan, eight in Azerbaijan, seven in Armenia, Georgia in Alekseevka, in Ukraine there are 15 laboratories, in which the US military produces deadly viruses. An example of such a laboratory is in the city of Merefa, Odessa region, where cholera vibrios were discovered in the river hours ago. An increased state of California flu among Ukrainian soldiers has been proven.

As early as 2018, the chief of the radiation, chemical and biological protection of the Russian military forces, Igor Kirilov, stated that Georgian citizens were tested on their citizens by the Richard Lutger Laboratory of US Defense Examiner Donald Rumsfeld in Tbilisi. For decades, the United States has refused to sign an international treaty to control the production of biological weapons. Since 2002, the CIA has been collecting genetic data from different population groups and analyzing how different infectious diseases can serve them.

INCIDENTAL EVENTS

Suddenly, on February 4, 2020, SPIC expert Dr. Frank Plummer, who "honored one of the leaders with an important leadership role in the SARS, H1N1 and Ebola epidemics, died. Previously, on 24 January 2020, WHO World Health Organization Executive Director Peter Salama surprisingly rested.

6. The Consequences on the Economy and Societies of the Corona Virus Pandemic

Changes in the economies of countries. There is a real change in the economies of the countries. In fact, China's factories were initially shut down suddenly and immediately. The effects of the pandemic are also felt in Europe and the United States. The global economy has shown signs of slowing down, but after the epidemic has erupted the recession is guaranteed.

Economic, biological and psychological war is being fought against China.

The real goal is to reset the financial markets.

World Workshop - China closed.

By mid-February 2020, 70% of China's economy was closed, in fact more than 80% of manufacturing companies were closed, and 90% of China's exports were actually reduced. However, unlike the SARS epidemic, when China's economy is 4.5% of world GDP, China's economy now accounts for at least 225 of

the world's gross domestic product. There is a disruption of supply chains, leading and causing entire industries to restrict their production. All car companies in the US, CANADA and Mexico are closing. Automobile factories in Europe are also closed, and Ford, General Motors and Fiat Chrysler are closing down factories in Detroit.

There is a real contraction in China's production by 40% in the first quarter. For the US, this is 14%. Over the next quarter, with these remedial stocks in China and the deteriorating situation in the US, it will increase the contraction of the US economy by at least another 15%. As China is a supplier of parts and equipment, this will cause half of the economy in other parts of Europe to stop working. In reality, Europe's economy will be blocked and already is, as will the US. All governments really need to focus on access to food and medicine for the population, utilities, healthcare and health services.

In fact, due to the improvement of the situation in China in March - April, there will be a recovery of 60-75% of normal production levels, in May - June there will be a 100% recovery. The risks are for tourism, travel, transport, both freight and air transport. As of mid-February, 85% of manufacturing firms were closed in China and 90% of exports had not been realized. For comparison, when the SARS epidemic occurred in China in 2003, China's gross domestic product was 4.5% of global GDP, while the Chinese economy currently accounts for 22% of the world's gross domestic product.

China has become a global factory that produces all kinds of industrial goods and high-tech goods. On the other hand, there are hundreds of millions of solvent users in China who spend a lot of money on cars, luxury goods, real estate, tourism, and more. China produces 18% of the world's GDP. China produces 25% of the world's industrial production. China is responsible for 39% of global economic growth for 2019 in the world.

Car manufacturers

In China, all car factories of world-class manufacturers Volkswagen, Toyota, Daimler, General Motors, Renault, Honda, Hyundai were closed. About this batch will drop 20% of production in the first quarter of 2020. In the province of Wuhan, where the production facilities of all automakers are located. Hyundai Motors, General Motors and Ssang Yong Motor have also stopped operating in Hubei.

The electronic industry

Production of smartphones and tablets has stopped. Apple's factory employs only 10% of employees. The same applies to Qualcomm. The damage to manufacturers whose production in Vietnam, Taiwan, Malaysia, South Korea, Thailand depends on Chinese companies is huge. The entire Asian market imports about 40% of intermediate goods from China.

China is a worldwide supplier of products. There is also a real contraction in the commodity markets. China is one of the countries that is the largest consumer of raw materials in the world, with 40% of raw material consumption coming from China. The prices of those commodities whose market is falling, such as copper, iron ore, nickel, aluminum, and natural gas. The price of iron ore fell by more than 12%, the price of copper fell by 9%, nickel by 8%, which is a key element in the production of stainless steel. Nickel and aluminum prices fell by more than 6%.

Tourism business

It is the most sought after tourist destination in the whole world because they spend the most money during their tourism. Chinese tourists have paid more than \$ 277 billion for tourism abroad in other countries. Along with tourism, transportation is also blocked. Countries that have enjoyed Chinese tourists in Asia like Thailand, Vietnam, Taiwan, Hong Kong are the hardest hit and will lose tens of billions of US dollars. Tourism and travel account for 10% of the world's GDP. Losses of raw materials suppliers to China, Australia, Brazil will lose 0.3% of GDP. South Korea, Vietnam, Hong Kong will lose out because of supply chains related to Chinese companies. Losses in the world will amount to over \$ 3 trillion.

Loss to World Companies in China

China closes businesses and businesses in 14 provinces. These provinces produce 69% of China's gross domestic product, 90% of copper production, 60% of steel production, 65% of crude oil processing, 40% of coal production, 78% of Chinese exports. The Chinese government is providing 179 billion in aid to Chinese companies. No aid is provided for US companies.

More than 300 of the world's 500 leading companies, such as Microsoft, SAP, PSA Group, Levi Strauss & Co, McDonald's Group, Starbucks Inc., Google, Cummins, operate in U.S. Wuhan is the center of the automotive industry, the General Motors company that has factories there shut down. Losses have been made by manufacturers of iPhones and iPads such as Apple, the manufacture of gadgets for Apple's central China and in Shenzhen. Currently, only 10% of the workforce is employed there. Production of the iPhone loses 3 - 5 million pieces of different types per month. Apple's first-quarter profit is \$ 55.96 billion. US pharmaceutical companies, US financial institutions and US technology companies evacuate their associates. US companies General Motors, Honeywell, Facebook, Bloomberg limit the travel of their associates.

In fact, the recession follows in Germany, Italy, the United Kingdom. IN USA. 18% of GDP is .35% is US consumption.

This is a procedure scheme for redistribution of property.

8. Scheme for Bankruptcy of USA Under the Current Crisis

Preconditions available. 93% of US trade depends on China as Chinese goods are sold. This process has stopped, no Chinese goods are being exported to the US.

US Balancing scheme as a country and economy:

If China secures supplies of goods and services and resources, and replaces the US as a supplier of goods imported into China, and replaces them with other suppliers.

If China secures its supplies of compressed gas, oil and other products from other countries, if it guarantees the supply of raw materials from other countries,

If the BRICS countries - China, Russia, Iran, Brazil and other countries who sympathize with and are ready to cooperate and cooperate with BRICS, create a common payment banking system with a bank to register these payments and create their own currency, and ignore the US dollar.

And If production in China and other BRICS countries resumes sooner, and trade is concentrated mainly between the BRICS countries and the close sympathizers and non-US dollar BRICS, it will chase away the US and their currency.

Actually, who pays with them will pay only in that currency. That US, even though it has a money printing factory, will be forced to go bankrupt.
