**Creation of Terrorism and the Fight Against its Method and
Strategy for Profits of Prof. Momchil Dobrev – Halachev’s
representatives of “Financially Banking Resource Technological
Mafia-driven Materialismus”**

Lord Prof. Momtchil Dobrev, Ph.D. Mariola Garibova, Alexander Gariboff & Mariika Dobreva
Scientific Research Institute Dobrev & Halachev JSC.

Abstract

In 2010, Lord Prof PhD Momtchil Dobrev-Halachev developed “Financially banking resource-based technological mafia-driven materialism” as a principle-based materialism since more than 17 centuries. In 2008, “The theory of generating crises”, in 2010, “Theory and praxice of the Mafiotismus” and in 2001, “The Mafia Theory”. The creation of and combating terrorism as a method, a profit strategy for the representatives of the financial banking technology mafia materialism.

Keywords: mafiotismus, terrorism, mafia, corruption, finance.

1. Introduction

In the year 2010 Momtchil Dobrev developed the "Theory of Mafiotismus" as a new state level based on the private and personal interests of prime ministers, ministers, government. Based on this "Theory of Mafiotismus" Lord Prof. Momtchil Dobrev developed 2010 the “Financially banking resource-based technological mafia-driven materialism” as a principle-based materialism since more than the 17th century.

In the year 2001, Momtchil DObrevev developed the theory of the mafia and the theory of corruption. All the both theories have been developed by analyzing the mafia and corruption all over the world. Analyzing the process of creating terrorism, combating it, and whether it is primarily aimed at generating profits for participants in this process, is of great importance for revealing the real truth and real processes in the fight against terrorism.

In this paper we described the creation and counteraction of terrorism as a method, a strategy for profit for the representatives of the financial bank resource technological mafia materialism.

1.1 Introduce the Problem

The problem of the emerging new kind and the real “Financially banking resource-based technological mafia-driven materialism” as a based principle of the development of society since the 17th century and as the opposite of Carl Marx's “Historical materialismus” of capitalism and after that based on the theory of Carl Poper and his follower the financial guru George Soros developed by Lord Prof. Dr. Momchil Dobrev as a part of Mafiotismus is enormous because it concerns not only the rule of one state but also the governance of a union of states and the way of governing the world. This is really a world order maternalism with precisely defined principles and ways of management.

2. Research Methods

Research methods of occurrence of Financially banking resource-based technological mafia-driven materialism and the Mafiotismus, its logic of work, of existence, of management and its execution by activities of the George Soros are the following:

- Analysis of the history
- Analysis of the wars and revolutions since 17 century
- Analysis if the ways of the financing of these wars and revolutions
- Analysis of the people, crises, institutions that are driven all the processes
- Analysis of the real process in beginning wars, the process of the wars and the revolutions, the financing of the parts participants in the wars and revolutions.
- Analysis of the laws of one country.
- Analysis of all authorities in one country - judicial, legislative, executive
- Analysis of the implementation of the laws of a country
- Analysis of management of public affairs
- Analysis of the existence and / or presence of civil society.
- Analysis of the work of the Prosecutor's Office as a guarantor of the existence and development of mobbing.
- Analysis of the social directions of development of a society
- Analysis of the judiciary - laws, judges, choice of judges, development of judges, violations of judges, disciplinary and other liability of judges, prosecutors, investigators.
- Analysis of history
- Analysis of the First world war – financing, reasons
- Analysis of the Second World War – financing, reasons,
- Analysis of the French revolution – financing reasons
- Analysis of the American independence war - financing, reason
- Analysis of the establishment of the USA
- Analysis of other wars and revolutions.

3. Principles of the Financially Banking Resource-based Technological Mafia-driven Materialism

The principles of the Financially banking resource-based technological mafia-driven materialism:

The only purpose is the profit and enslavement of peoples, states, governments, creation of monopolies.

Participating countries - banks, financial institutions, companies - oil, resources, steel, oil, food, medicines, fuels.

Finance and money determine politics, wars, peace.

Primary goal and approach: Central bank formation in the major countries to control not only finance, but also economic activity and politics. These central banks will be governed by governments, states, parties, citizens, a whole territory, in terms of money, investment, resources, use, in whose behalf and for what. These are the

initial steps. Establishment of central banks in the major countries in fact to control not only finance but also economic activity.

Establishment of central banks in countries owned by private individuals and private banks. This controls the economies of these countries, governments of these countries, citizens, over entire societies. Where central private banks are not allowed to be created in the countries - it is the occasion to generate civil wars, wars between states, trigger "revolutions" - to finance them from the bank-financial resources technological capital. Creating conditions for destabilization of the country concerned, importing corruption, provoking a civil war, provoking war, creating conditions for the maturing of an economic crisis, leading to the destabilization of the political power in the country.

Generating and provoking wars, conflicts, fickle confessions, financing both the warring parties with loans - with the ultimate goal of profit, debt, then giving credit for the recovery of these states, lending to rebuild the economies of the warring states, shunning companies managing resources - oil, gold, trade, medicines, food, creating a military situation - unlocking - an institutional occasion.

System: Funding both sides to wage war between them. Practical parties are indebted to banks, then banks and financial institutions finance the recovery of their economies. Profits are enormous. The profit rate for weapons and ammunition is the highest and most rapidly recoverable and revamped. They finance supplies of weapons, ammunition, food, clothing, ammunition, extra equipment, they actually manage the war process - when there is an advantage for one side, for the other. Realistically with supplies of weapons, ammunition, they manage the process of war - which side takes precedence and when and for how long.

The Goal:

Government control - not only through finances, but also by building up faithful government and state subjects - from universities, world institutions, clubs, lodges, foundations, which then either become presidents, prime ministers, ministers, leaders and important institutions.

- Control of security services and control of compromise.
- Control of whole countries.
- Through debt securities control of governments, states.
- Money control, their circulation, movement, direction, direction.
- Policy control and policies.
- Press control.
- Policy control.
- Control of the Masonic lodges.
- Purpose and purpose of war, military conflict, aggression - profit.
- Control and avoid the introduction of technology.
- Control and prevent the production of technology and free energy to be enjoyed by all people and peoples.
- Control of patents that contribute to the development of civilization, not to see the world, to be forgotten, not to be used.
- Control and liquidation of scientists who have created innovative solutions for the benefit of humanity in science, technology, and treatment.
- Control and avoidance of the production of treatments for the treatment of lethal diseases.
- Import and export of corruption in one country to its destabilization.
- Imports of terrorism.
- Export and import of mafia principles in one country.
- Debt economy, money control. A person who controls money controls states, societies, peoples, governments.

- Manifestation of the masses, peoples, personalities.
- Personality control, with debit, credit cards, mobile phones, mobile applications - uninterrupted control. It; / RTI & gt;
- Civil Society Control through Foundations - NGOs to Replace Public Opinion, Funding to Control and Manage Society.
- Command not all resources of the earth, oil, gold, silver, uranium and income from them.
- Managing the population through illnesses.
- Management of the population through pollution of the environment.
- Technology management, when technology is being introduced into a conversion, why not, keep another, disappear.
- Private repositories of tremendous wealth.
- Crisis Generation - Any, Economic, Currency, Social, Refugee, Conflict, War Political Crisis ., The financial crisis occurs the fastest, the currency crisis occurs instantly, They are followed by economic crises, Part of the financial crisis and one kind of it is the currency crisis. There is a financial crisis. There are always economic crises.
- World currency controlled by members.

Crisis Generation Schemes:

- Invocation of wars.
- Invocation of military conflicts.
- Call for military intervention in a country.
- Import and export of corruption, mafia.
- Tracking money out of circulation, it immediately creates economic crises. In turn, they cause huge damage to whole countries. Accordingly, he gets loans.
- Crisis crisis - caused - creates economic, social, demographic, social, political crises.
- Inviting the Financial Crisis.
- Inviting the Currency Crisis.
- Inviting Economic Crises.
- The call for an otic crisis - not always last.
- Increase of deficit - for the purpose of signing.
- World wars become redundant due to the danger of nuclear exchange, so terrorism will be used.
- Managing the population through fear. Planting fear among the population.
- Creating an antipode - through fear, manipulation.
- Creating an intrigue machine.
- Creating a machine for seeming occasions - for wars, conflicts, aggressions, diversions.
- Induction of inflation and deflation afterwards.
- Creating antipodes - with the ultimate goal of the Cold War battle - generates huge profits, enormous cash flows.
- Possession of resources.
- The machine of intrigue and compromise and the creation of fake occasions.
- Generating, financing and combating terrorism.

All the above proves how representatives of the Financial - Banking Technology Mafia Materialism in Europe and the US organize the whole process of triggering refugee crises, refugee waves, the process of replacing civilizations, importing terrorism, creating terrorism, launching a war on terror created by them, the sole purpose of this whole process is huge profits.

Everything is based on Lord Momchil Dobrev's Theory of Mafia.

Formula of the Mafiotismus

The most simple model of the mafiotismus that describes the factors that affect the amount, type, and etc of the mafia is the following:

***Mafiotismus** = PERSONAL Power / on the top of state institutions / state and etc./ + Influence + Connections / to personal, private companies + Interests / personal, private, corporative / + Order / Orders + Personal management of all state nevaus + Personal Control of all states niveaus Mafia structure / inside or outside / + Monopoly Rights + laws / rules / practices / procedures + possibility of taking an alternative decision - obligation - responsibilities - morality / ethics + Personal management and personal control of distribution of public state monetary and other resource (including European funds and funds).*

This Mafiotismus is a base of the “Financially banking resource-based technological mafia-driven Materialism” developed by Lod Prof. Momtchil Dobrev – Halachev.

4. Generation and Financing of Terrorism and after this Combating this Terrorism - the New Strategy for the Profit for the Representatives of the Financial Banking Resource Techlogical Mafia-driven Materialismus

4.1. The cause - and the follow-up - at the state level

Staged Theorism - September 11, 2001:

The Nuclear Truth on the Occasion of September 11, 2001, for the Proclamation of Terrorism and Combating Terrorism by the United States and FBI Representatives Mafia Materialism.

Facts: The burning temperature of kerosene is 895 degrees Celsius. The temperature that caused the steel to become powder is at least 2,700 degrees Celsius. The destruction of the World Trade Center has nothing to do with airplanes. The south tower, in which the second plane struck, falls first. The north tower, which crashed the first plane, collapses the second. Based on the fire, it took 1 hour and 42 minutes for the first tower to fall and only 56 minutes for the second tower to fall completely. The demolition of the towers has nothing to do with the fire caused in both towers. The fall of building # 7 is not mentioned at all, date # 7 falls all over the line, ie. the terrorists' planes were pointless. If the goal was to demolish the two WTC buildings. The North Tower actually collapsed later in the wake of the "fourth" explosion. Mafia television, however, did not mention the above and did not deliberately give the footage. It was announced that the two towers were destroyed by kerosene, and building # 7 of diesel fuel, which was for emergency diesel generators.

On September 11, 2001, agents from the FB were wearing full chemical gas mask kits to protect against radioactive dust from radioactive vapor. There is Ground Zero - this is the point on the surface of the earth at which a bomb exploded. The Pentagon was not struck by an airplane as the remains prove that the Pentagon was struck by an aircraft but by a rocket. The missile is owned by the US Air Force.

In reality, this is an accurate and clearly prepared reason for the war on terror to be declared, to fund this war and to gain from this funding the representatives of the Financial Banking Technology Mafia Materialism. A war is being declared against something vague, indefinite, unpredictable, unknown, for which hundreds of millions of US tanning salons have previously been given to create it.

The actual cause of the September 11, 2001 attacks has provoked the general public in the US community - fear, shock, anger, pain, grief. Barack Obama - April 14, 2010 in Washington, DC - "If all authoritarian actors continue to operate as they have before, terrorists are more likely to fire an atomic bomb in any of our cities is 51 percent or more."

On the other hand, there is real evidence that these attacks were prepared by the involvement of these representatives of the Financial Banking Technology Mafia Materialism, since the temperature reached above 2700 degrees which causes the real steel to become dust cannot be caused by the explosion the tanks of kerosene airplanes whose temperature is not more than 895 degrees. Ie There is undisputed evidence of bombings on each floor of one tower.

On the other hand, it proves not a plane but a rocket that crashed into the Pentagon building. In these processes, atomic micro-bombs were used. But the false information and the psychological attack on society in the US have achieved their goal - the president and the state have adopted the so-called "Patriotic Act", which actually limits the rights and freedoms of citizens, namely:

- Surveillance of citizens without court authorization
- President's right to appoint a civil or military court to hear a particular case
- Transfer of detainees to other countries, extradition of certain persons, torture
- The murder of American citizens by order of the President.
- Right to terminate the prosecution under the pretext that there is a state secret.

Ie the president can take away civil rights in an unprecedented way.

There have been artificially provoked terrorist acts to justify tightening control and, accordingly, to provoke war, military conflict, intervention in a foreign country. The war on terror is a real war, not information tracking, radicalization, incompatibility of Islam with democracy.

Creating networks, informant systems, to provide information - all kinds.

Bringing apart terrorists, bringing disagreements, unbundling the cohesion of terrorist groups, recruiting, focusing on leaders.

Scheme of creating fear for the population, with which fear of justifying any action by states, organizations, any kind of financing, in organizing, waging war.

Threats of terrorist acts against the population, created fear of citizens, are used to:

- Financing of counter-terrorism actions
- Financing wars and conquering countries
- Financing of the military industrial complex,
- Financing the development of strategic assets - nuclear submarines, ballistic missiles, nuclear missiles and others.

The idea of a war on terror was born after 9/11, in order to justify any action by the US government to allocate huge budgets to finance the fight against terrorism. Terrorism provides for the psychological destabilization of society. Really finding one enemy and designating it as a psychologically terrorist creates fear, hatred, horror, panic that arises in the society, which on the other hand is the reason and the reason for the representatives of the financial banking technology mafia materialized materialism to prepare measures for combating this terrorism. and in this program the most important is the financing of this fight against this terrorism. This covers the financing of

- Internal security - within the country itself
- The external environment - military action.
- Investing in new weapons and more.

Financing the external environment - ie. military operations include the full range of military equipment, military bases, weapons, people, personnel, the entire armada of troops and others, intelligence services and more. In reality, this information - psychological impact on society is used solely for political purposes, so that it can then be financed. It's a fight that has been going on for months, years. Following the manipulation of society, the political class that executes the order of representatives of the financial bank's resource

technology mafia materialism are given full freedom to point the enemy, without any real responsibility for false claims.

Different versions / whether the availability of chemical weapons, the availability of nuclear weapons, the availability of chemical weapons with which to trade funding for separatists and other organizations are prepared in advance. In reality, it is an instrument of the representatives of the Financial Banking Technology Mafia Materialized Materialism for provocations. In recent years, it has been proven that most of the acts of terrorism committed were carried out with the assistance and under the direct supervision of state secret services. Everything is done in complete secrecy. An occasion is actually generated, which is the occasion used to fund this "fight".

On the other hand, with the psychological manipulation, the political class guarantees and justifies its actions, which are in line with the public's desire for such actions. This is how the United States organizes and begins the fight against terrorism, which is a real war. And there is a lot to be gained from this war. For Europe, terrorism is a criminal activity and in fact terrorists are criminals, and laws and human rights must be respected.

In war, huge resources are directed from the social sphere to military thinking. This is how militarization of social life becomes real. In reality, the procedure is the instilling of fear, fear, threats, which imposes security measures, which in turn people give up their freedom for the sake of security. In reality, this war goes beyond national security. The threat of terrorist acts has also been used as an argument to fund the purchase of military equipment, submarines, ballistic missiles, aircraft carriers and more.

In fact, the idea of a war on terror was born after the September 11, 2001 attacks. In reality, this is an accurate and clearly prepared reason for the war on terror to be declared, to finance this war and to gain from this funding the representatives of the Financial Resource Technology Mafia Materialism.

On the other hand, the start of the New War - The Fight Against Terrorism, right after the end of the study war, dates from the 1960s and 1970s, when the United States and other countries organized and prepared radical Islamic Islam, financed it, so that it could a war was declared against him. In fact, the assassinations are justification for the ruling and representatives of the FBIHM for waging war, conquering states, subjugation of peoples. On the other hand, this leads to the financing of wiretaps, kidnappings, murders. Creating conditions for declaring war on terror.

The cause is being used by the United States to adopt the Patriot Act - a Patriot Act - approved by the US House of Representatives and Congress by 357 to 66 votes. On November 26, 2001, George Walker Bush signed the law, which was extended until 2015 and who proclaims:

- Surveillance of citizens without a court decision
- President's right to appoint a civil or military court to hear a particular case
- Right to terminate prosecution on the pretext that it is a state secret
- Transfer of detainees to other countries, including those suspected of being subjected to torture
- The murder of US citizens by order of the President.
- Constitutional exercise of power over citizens
- The FBI is conducting erectile spying in violation of the Fourth Amendment to the Constitution.

The attacks serve as justification for wars, subjugation of states, eavesdropping, harassment, questioning the civil and constitutional rights of citizens in a democratic society. The beginning of preparation for this fight against terrorism began as early as the 1980s, when the West and the United States supported, created Islamic integritism, with the ultimate goal of counteracting the occupation of the USSR in Afghanistan.

4.2. The Afghanistan War

The Afghan war is called the "culture war", or the "crusades" against the Islamized world by the organizers of the fight are terrorism. The war with Afghanistan began on 7 October 2001. It is a military operation of a coalition of US-led states aimed at controlling the entire country of Afghanistan. The operation is called Operation Triple Freedom. It starts with 28,300 US servicemen. The second operation is NATO - ISAF, with the participation of the United Kingdom, Canada, Australia. In these operations, US and British planes have been bombing entire cities for weeks. In early 2002, the land operation began.

The reason for starting the war is the demand for Osama Bin Laden's extradition requested by the Afghan government. After the Afghan government refused, it was given a carte blanche to start the war, the other goal being the overthrow of the Islamic regime by the Taliban. On May 2, 2011, US commandos killed Osama bin Laden. The actual cost of this war is \$ 1 trillion, with the Department of Defense, the State Department and the Agency for International Development claiming to have spent between \$ 934- \$ 978 billion. The money is actually spent uncontrollably, one billion is given to helicopters and airplanes to arm the Afghan state, which have not been used for a long time, a billion are given to construct buildings and infrastructure, \$ 34 million to grow soybeans, which in reality but can to plow through the lands of Afghanistan, \$ 28 million for special camouflage uniforms, provided that only 2.1% of Afghanistan's area is forested. In fact, 775,000 US troops have participated in the war in Afghanistan.

All this is true that the governments of George W. Bush, Barack Obama and Donald Trump have not told the truth about the goals for the war in Afghanistan and the real money spent is not true, proves a December 12, 2019 Washington Post post. 2000 pages of confidential documents proving that the purpose was not to establish a democratic government in Afghanistan, none of the above is true.

The fact that all the spending of money is for the ultimate purpose of securing profit for the representatives of the Financial Bank Resource Technological Mafia Materialism is also proved by the fact that for 2015. The Pentagon has spent an estimated \$ 6.5 trillion, such reports have existed since 1998. ie expenses for the period 1998 - 2015 are at least \$ 21 trillion. This is real money printed, which is the ultimate goal of earning the representatives of the financial bank resource technology mafia materialism.

4.3. The War in Iraq and What the Figures are - the Profits

The Iraq war gives an investment of \$ 411 million every day. In reality, the cost of the Iraq war is between \$ 3 trillion and \$ 4.4 trillion. The war began on March 20, 2003 when Britain and the United States attacked by air, land and sea, backed by Australia, Denmark, Poland, Spain. On March 6, 2003, the inspectors published a report declaring that they did not believe that Iraq - with its steady economy and development level - was able to develop or maintain a program for the development of weapons of mass destruction.

On the other hand, the US has repeatedly stated that the al-Qaeda group has terrorist training camps in Iraq and that Saddam Hussein himself supports it financially. Al-Qaeda's relative, Osama bin Laden, strongly denies this. Apart from that, it is stated that Iraq produces chemical and bacteriological weapons, which they could not find even after the state was destroyed and invaded and conquered.

Every second of the Iraq war costs \$ 5,000. In 2001. George W. Bush comes to power. This year, the financial sector becomes more powerful, more profitable and more concentrated. Five investment banks, two financial conglomerates, three rating agencies and three insurance companies are leading. A trillion dollar business is being set up.

The war in Iraq is worth \$ 5,000 for every second. 411 million every day.

The current cost per month is \$ 12.5 billion.

The cost is up to 25 billion a month. The estimated price will be \$ 3 trillion.

The cost of the war is 3.7 - 4.4 trillion dollars in 10 years.

The Price of War - The Watson Institute for International Studies at Brown University.

The cost of war is financed by the accumulation of deficits - which must include interest. In addition, the Pentagon received an additional \$ 326 billion and \$ 652 billion beyond the direct funding for the military.

Homeland security has spent \$ 401 billion.

In addition, the military who fought in Iraq and Afghanistan have filed additional claims for \$ 32.6 billion and for disability and treatment.

Veterans' compensation costs will increase from \$ 598 to \$ 934 billion.

Costs range from \$ 2.9 trillion to \$ 3.6 trillion.

George W. Bush - Congress allocates an additional \$ 120 billion

The war with Iraq began on March 20, 2003 when the United States and Britain attacked by air, land and sea. Supported by Australia, Denmark, Poland and Iceland.

Without a declaration by the UN Security Council to legitimize the invasion.

4.4. The creation of Al - Qaeda by the CIA and the United States and the subsequent war with al - Qaeda

Al-Qaeda was created in 1988 and is made up of mostly Mujahideen fighting the Soviet invasion by veterans of the 1979-1989 war against the Soviet Union. In fact, bin Laden is funded for this activity by the United States - the CIA, according to unofficial data, the CIA has allocated about \$ 500 million annually for the preparation and military assistance of the Mujahideen.

A US-backed slam rescue fund was later set up to strengthen Sunni extremism on an anti-conscientious basis. The goal is to counter Shi'ite Iran, which is the main enemy of the United States. The goals of Al - Qaeda and the US are the same - the expulsion of the USSR from Afghanistan. After the end of the war, bin Laden redirected his actions against infidels in every other country. 1998 bin Laden establishes the Islamic International Front for Combating Jews and Crusaders in Afghanistan, after being denied citizenship in Sudan. The headquarters of the organization 1991, when it was established, are located in Afghanistan and Pakistan. From 1991 to 1996 the headquarters is in Sudan - Khartoum. After the fall of 2003, al-Qaeda moved from Afghanistan to Iraq and Iran. The organization is primarily funded by companies controlled by Bin Laden in 35 countries. The status of bin Laden himself is estimated at about \$ 300 million. The largest economic entities are Wadi Av Akiz, Laden International, US \$ 300 million total capital, Taba Investment, Hijra Construction, Al Shamal Islamic Bank.

4.5. The creation and financing of an Islamic State by the United States and US partners and the war

The group's brain is Samir Abdel Muhammad al-Khalifawi (former Haji Bakar) - former colonel of Saddam Hussein Air Force Defense Intelligence. He created one of the predecessors of ISIL - Islamic State in Iraq. He also appointed Abu Bakr al-Baghdadi in 2010 as ISIL leader. He also plans to deploy the group in Syria. 2014 was killed by Syrian rebels.

It navigates the organization's plan, organizational charts, lists, programs, structure, action directives, operational program. Hadji Bakker makes the structure of Islamic State at the local level, ways and procedures of penetration into villages, way of monitoring, plan of attack, technical plan for Islamic State intelligence management, makes a plan for the study of worshiped people in the area, sources of their income, a list of the names of the members of the brigades, the names of the leaders of those brigades, the investigation of their illegal activities for the purpose of blackmailing and harassment, and extortion for the purpose of carrying out the government's procurement activities.

Creating a scheme of informants, ex-scouts dissatisfied with the system, Plans include schools, kindergartens, media, transportation, finance, monitoring systems at all levels, to ensure monitoring at any and all levels. In 2010, Saddam Hussein's Iraqi recruiting services were appointed to the emir, later by Caliph Abu Bakr al-Baghdadi.

The Islamic State is governed by one leader and four Shariah councils, a religious council, a Shura-advisory council, a military council and a security council. Islamic states are opening missionary offices through which the organization expands in secret, without noise, and very comprehensively. Enlargement takes place without resistance, without attention, and at the same time abductions and killings of enemies of the state take place. Military camps have been set up in many places since late 2012, and newcomers have been training for two months. The organization is inconspicuous and is expanding at a tremendous pace. In the fall of 2013, ISIL counted 2,650 foreign fighters. The organization simulates multiplicity, with its fighters appearing in black masks and, when they appear in many places, simulating multiplicity. Persons who may be a potential leader or foe are removed.

The main features of ISIL are:

- Organization of a rebel type
- An uncompromising jihadist-Salafist organization
- Extreme terrorist methods and rebel strategy are used
- Claims to be a true guardian of Wahhabi traditions
- Purpose - to restore the caliph of true Islam in Syria, Iraq and nearby border territories.

IDIL Genesis:

- 2002 - Organization of God's Unity and Jihad
- 2004 - Organization of Jihad's Base in Mesopotamia
- Al-Qaeda and Iraq
- 2006 The Islamic State of Iraq
- 2013 - The Islamic State of Iraq and la Sham / the Levant
- 2014 - Islamic State

IDIL's budget is \$ 2 billion for 2015. They sell oil, smuggle goods, trade with people and human organs, donations from the Arab world, their own charity programs, control oil reserves, control oil production, smuggling cigarettes, medicines, cell phones, sell antique artifacts - stolen from Syria and Iraq, ransoms for kidnappings, kidnappings for human organs, donations from Gulf states Saudi Arabia, Kuwait, UAE, Qatar, system racket, taxes, racket racket ed companies, large and small businesses. Propaganda is organized on the social networking system and they take full advantage of these networks, publishing magazines, articles, interviews, photos, analyzes - political, military economic analyzes.

5. Causing Wars Fighting Terrorism as the source of the greatest profits. The following period - Harnessing Economy and Trade for Maximum Profits Based on Momchil Dobrev's "Crisis Generation Theory" and Prof. Momtchil DObrev's "Financial banking resource technological mafia driven Materislaismus"

A challenge to war necessitates and requires that it be financed, with both credit and output. Banks, financial institutions, arms companies, the military-industrial complex, and not the political mafia, are involved in the process. As a result, after each war there is an economic crisis, a production crisis, an industrial crisis, a social crisis, a social crisis. These crises have to be financed, there is usually a substitute for the economy in question by the aggressor, who owes its warplanes for years and his presence, redistributes goods, derives mostly from profits.

The aggressor draws profits in all areas of development of a country or region.

WARS in which the US participated and created military conflicts.

The Mexican War of 1840 L was worth \$ 2.4 billion

The ratio to Gross Domestic Product since 1847 is 14%.

World War II cost about \$ 4.1 trillion or 36% of GDP in 1945.

Until World War II, almost all of the country's military budget was spent on participating in military conflicts. The United States spent 1.1% of GDP on 1899 for the Spanish-American War and 1.5% on defense spending. The Second World War is worth \$ 4.1 trillion, killing 400,000 American soldiers. American participation in World War II began on December 8, 1941.

The Iraq and AFGHANISTAN wars cost over \$ 4.1 trillion.

Third is the Vietnam War. In it, the US spent \$ 738 billion, or 2.3% of the country's GDP in 1968.

For the past 10 years, the United States has spent between \$ 3.7 and \$ 4.4 trillion.

6. The High Rate of Profits on Arms and Huge Free Money - Profits on This Business, The Transfer of this Money - the Launch of this Money in Construction Over-easy Ballon in the Global World

Macroeconomics do not account for - Given industry what is the rate of return. Whether this rate of return is invested back and in what size and share and more importantly in what industry. All income and savings are equated to different industries in one industry- making mistake. Moreover, there are schemes to legally conceal profits - through so-called offshore companies. There are different rates of profit across the various sectors of the economy. For example, in the military products industry, the rate of return varies from 30 to 70% minimum. This is the industry with the highest rate of profit. The light industry is about 5- 10%. Food industry 15-25 percent. But both in terms of volume and volume, arms and ammunition sales are the largest.

From here, the wrong conclusions of macroeconomics for a given state of the planet's economy follow. The following are the wrong conclusions about the consequences.

A distinction must be made as to which industries are state-owned and which industries are dominated by private companies. Pentagon spending on Iraq and Afghanistan wars is \$ 1.6 trillion. and This means that the profit margin is 30 to 70 percent for different weapons, equipment and more. To put it simply, that means over \$ 1 trillion in free investment money. Where - in the closest and fastest returns in the industries.

The profit margin for cocaine where to invest? In construction. Money laundering of drugs and weapons takes place during construction. There the payback periods are the shortest and the payback is the fastest - 18 - 22 months. The profit margin is 300 to up percent.

The cost to the world for the period 2004 - 2008 for the sale of military equipment is \$ 114.38 trillion.

For the US, this is \$ 34.9 billion for 2008 alone - \$ 6.159 billion.

For Russia, \$ 28.536 billion, or \$ 5.953 billion in 2008 alone.

For Germany - \$ 11.450 billion - for 2008 - \$ 2.837 billion

For France - \$ 9.607 billion - for 2008 alone - \$ 1.585 billion

For the UK - \$ 5.132 billion - for 2008 alone - \$ 1.075 billion.

The sales figures for the two largest nations are as follows:

About USA -

2004 - \$ 6.648 billion

2005 - \$ 6.786 billion

2006 - 7.394 billion

2007 - 7.914 billion

2008 - \$ 6.159 billion

About Russia

2004 - 6.353 billion

2005 - \$ 5.485 billion

2006 - \$ 6.186 billion

2007 - 4,559 billion
 2008 - \$ 5.953 billion

With the 2007 military sales at current prices you are looking ten in the world are as follows:

1. Boeing USA
2. BAE Systems - - 29.850 billion
3. Lockheed Martin -
4. Northrop Grumman USA
5. General Dynamics USA
6. Raytheon USA
7. EADS
8. L-3 Communications USA
9. Finmeccanica - Italy
10. Thales France

Among the first 100 companies - 45 are from the USA, 32 are from Europe, - 10 are for the UK, 8 for France, 4 are for Italy, 5 Germany, Russia there are 7 companies for Japan and South Korea for 4 companies Israel and India - 3 companies for each.

Top 100 companies for 2007 - total sales of \$ 346.9 billion. For 2006 - there is a 12% nominal growth. Countries bought the most weapons for 2004 - 2008 - are

1. China - \$ 12.980 billion
2. India - \$ 8.186 billion
3. United Arab Emirates - 7.105 billion
4. South Korea - 6.921 billion
5. Greece - \$ 4.813 billion

7. Financing Terrorism

State funding, examples US security services, barter terrorist financing - weapons against drugs - US example in a number of Latin American countries, going into legal business to fund terrorist activities, trafficking and drug trafficking - in the case of dozens of countries about Latin America on the part of the United States and in this case, Afghanistan, the financing of Western European terrorist organizations.
